01. Color Indicators in the SFA App

a. **Yellow:** The outlet is highlighted in yellow after a **Sales Order** is created.

b. **Green:** The outlet is highlighted in green after a **Sales Invoice** is generated.

c. **Pink:** The outlet is highlighted in pink after a **Call Lost** is recorded.

d. **Ash:** Indicates that an **image uploaded, or another transaction** has been completed for the outlet.

Figure 1 - Color Indicators

02. Loading and Unloading Process

Loading

- Loading is the process where the goods that will be taken on a particular day's tour are loaded to the sales rep's van. This is a process in van sales module.
- The Distributor needs to transfer the stocks in his main location to rep's main location.
- The items in the distributors' location will be automatically shown as suggested. Distributor needs to enter the quantity and click on the save button to complete the loading.

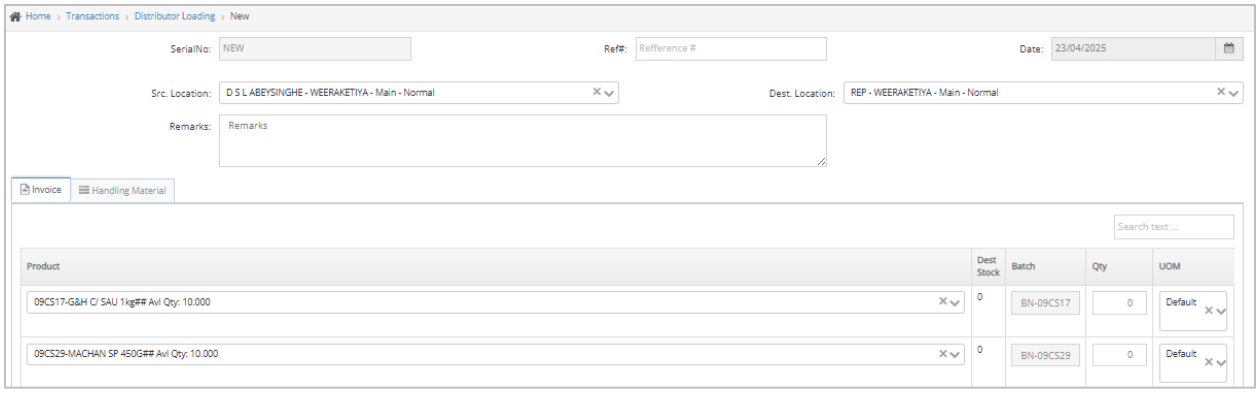

Figure 2 - Loading

Unloading

- On SFA the stock transfer option can be used to transfer stocks from the Reps Van warehouse to the Main warehouse when the actual unloading takes place.
- There is another option called Unloading. The system will suggest the quantities for unloading. Distributors can enter the physical quantities and do the unloading.

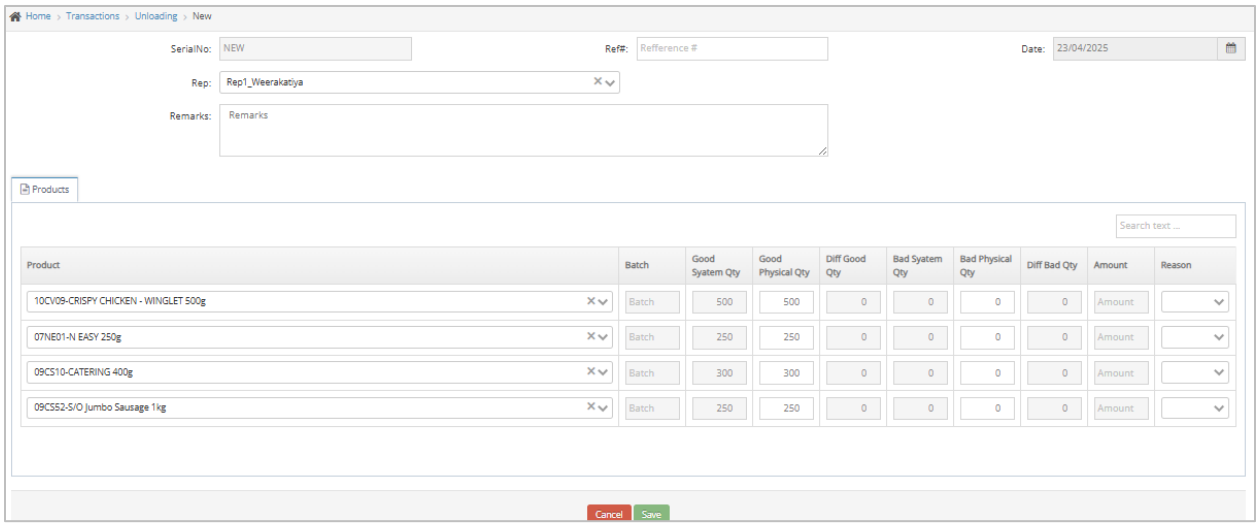

Figure 3 - Unloading

03. Sales Order including the Returns

- In the SFA app, a Sales Rep can record Returns as part of the Sales Order process.
- While creating a Sales Order, the rep can also include any returns the customer wishes to make. This streamlined process allows both sales and returns to be handled within the same transaction.

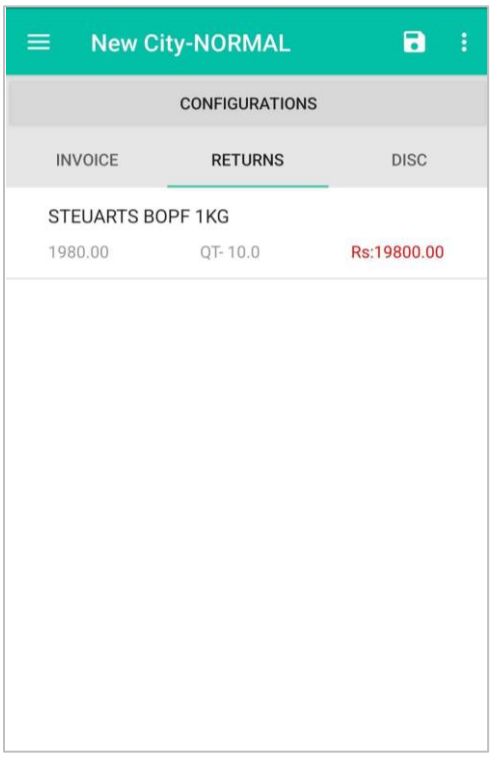

Figure 4 - Returns

04. Survey

- The **Survey Module** in the SFA app allows sales representatives to collect structured feedback or market data during customer visits using customizable surveys.
- Submitted responses are stored in the system and can be analyzed via backend reports for better decision-making.
- The sales rep can view the **"Survey"** tile within the transaction window.

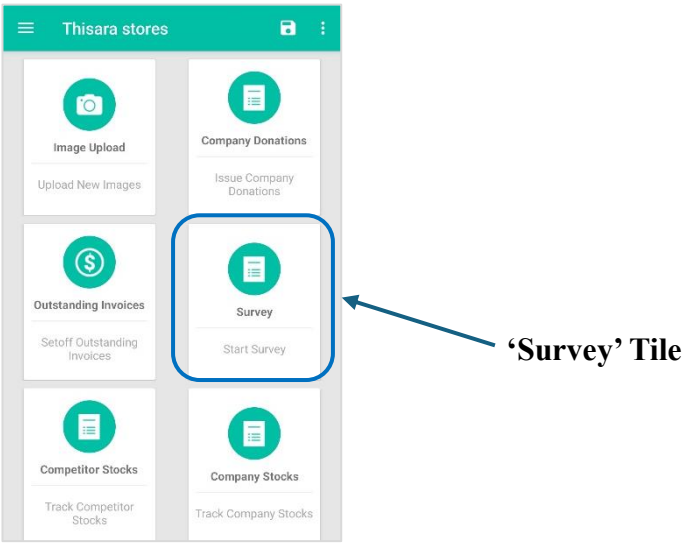

Figure 5 - Survey

- A dropdown list appears showing all surveys assigned.

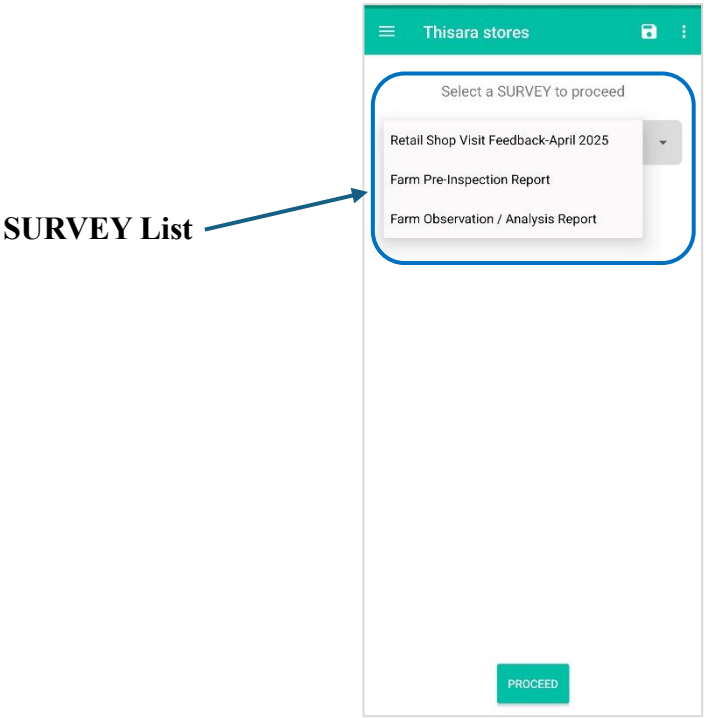

Figure 6 - Survey List

- Sample Survey for different **question types.**

1. edit_text
2. check_box
3. label
4. spinner
5. radio

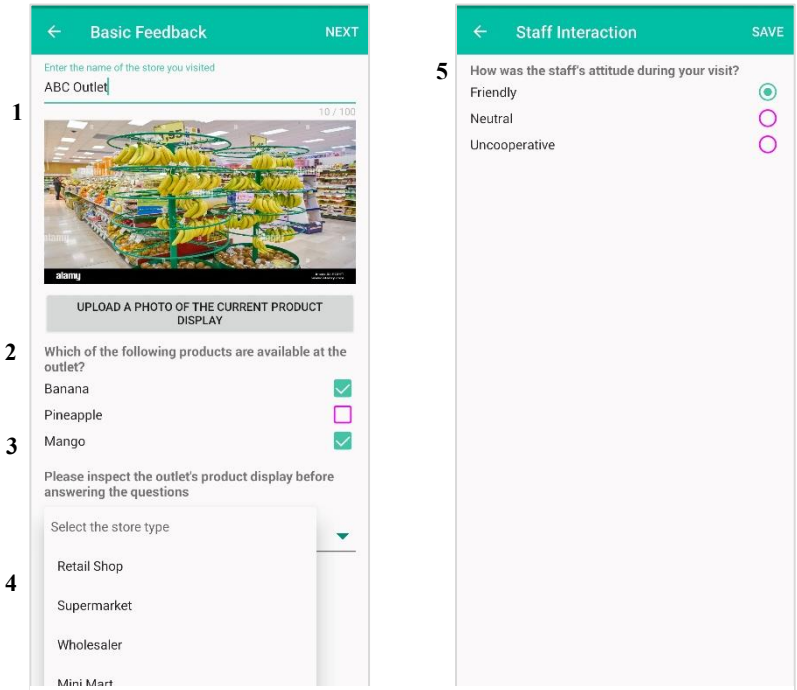

Figure 7 - Sample Survey

05. Backup DB

- **Backup DB** is the process of creating a secure copy of the current database. This copy can be used later to restore the system to its current state if needed.

06. Restore DB

- **Restore DB** is the process of recovering or bringing back a previously saved version of a database.

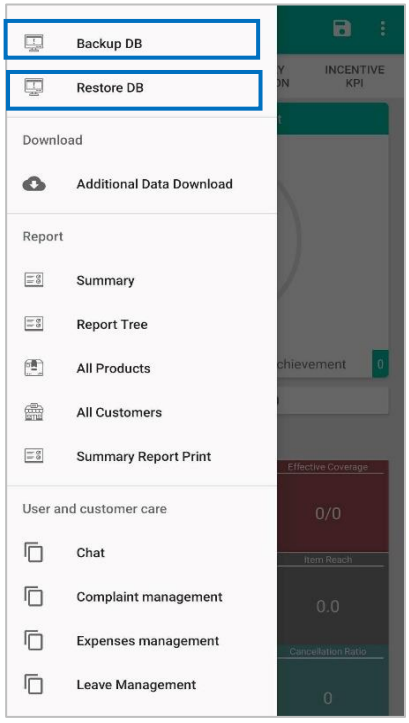

Figure 8 - 'Backup DB' and 'Restore DB' Option

07. Rep Expense Management

- The **'Expenses Management'** section in the SFA app, the rep can enter details of a **new expense.**

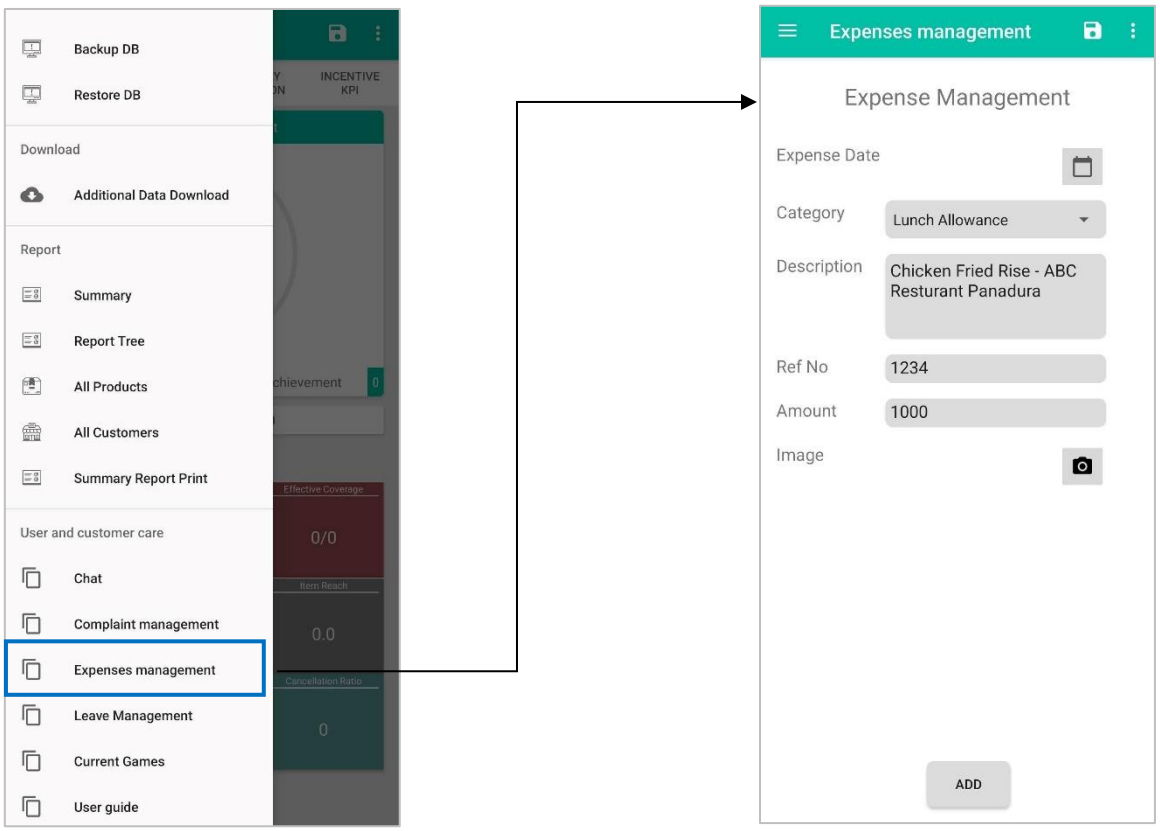

Figure 9 - Sales Rep Expenses Management

- **Expense Date**: Tap the calendar icon and choose the date the expense was made.
- **Category**: Pick the correct expense category from the dropdown (e.g.: *Lunch Allowance*)
- **Description**: Add details about the expense. (e.g.: Chicken Fried Rice - ABC Restaurant Panadura)
- **Ref No**: Enter the reference number from the receipt or bill (optional, if applicable).
- **Amount**: Type the total amount spent. (e.g.: 1000)
- **Upload Image**: Tap the camera icon to take a photo or upload the receipt as proof.
- **"ADD" button**: This saves the expense entry into the system.

08. ‘User Guide’ Option

- In the SFA app, sales reps have access to a ‘**User Guide’ option**, which allows them to view helpful content such as videos, planograms, or PDFs directly to the customer during a visit.

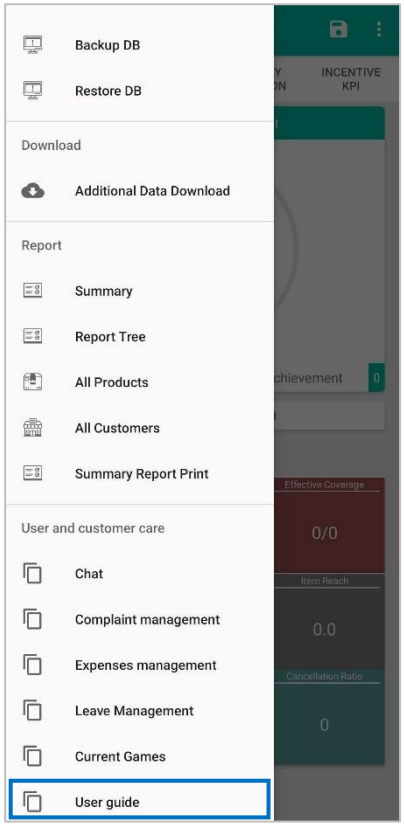

Figure 10 - User Guide

09. Live Query Typing Option

- **Live Query Typing** allows users to view real-time results as they type their query within the SFA system, enhancing speed and efficiency in data search.
-

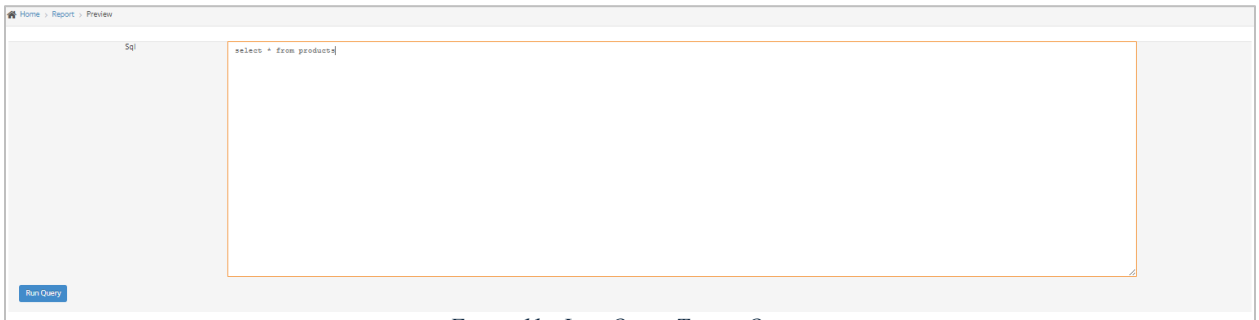

Figure 11 - Live Query Typing Option

10. Loading Summary

- A **Loading Summary** is a document generated by the distributor to organize and track the dispatch of goods.

In the SFA system:

- The distributor selects multiple bulk invoices intended for delivery.
- A Loading Summary is generated, listing all the items, quantities, and values.
- Based on the loading sheet, the distributor loads the stock into the delivery vehicle.

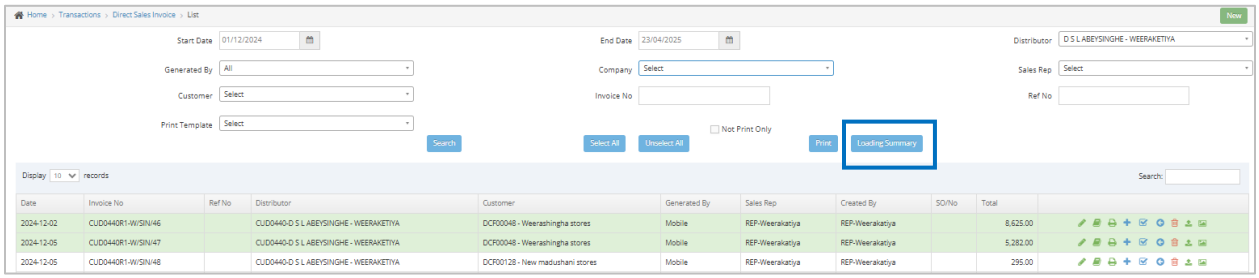

Figure 12 - 'Loading Summary' Button

Navigate to Sales → Direct Sales Invoices

- The distributor opens the list of direct sales invoices that are ready for dispatch.

Select Relevant Invoices

- The distributor selects one or more invoices that need to be included in the delivery.

Click the 'Loading Summary' Button

- This action compiles the selected invoices into a summarized format.

Generate the Loading Sheet Summary

Loading Sheet Summary

11. Customer Wise Price List

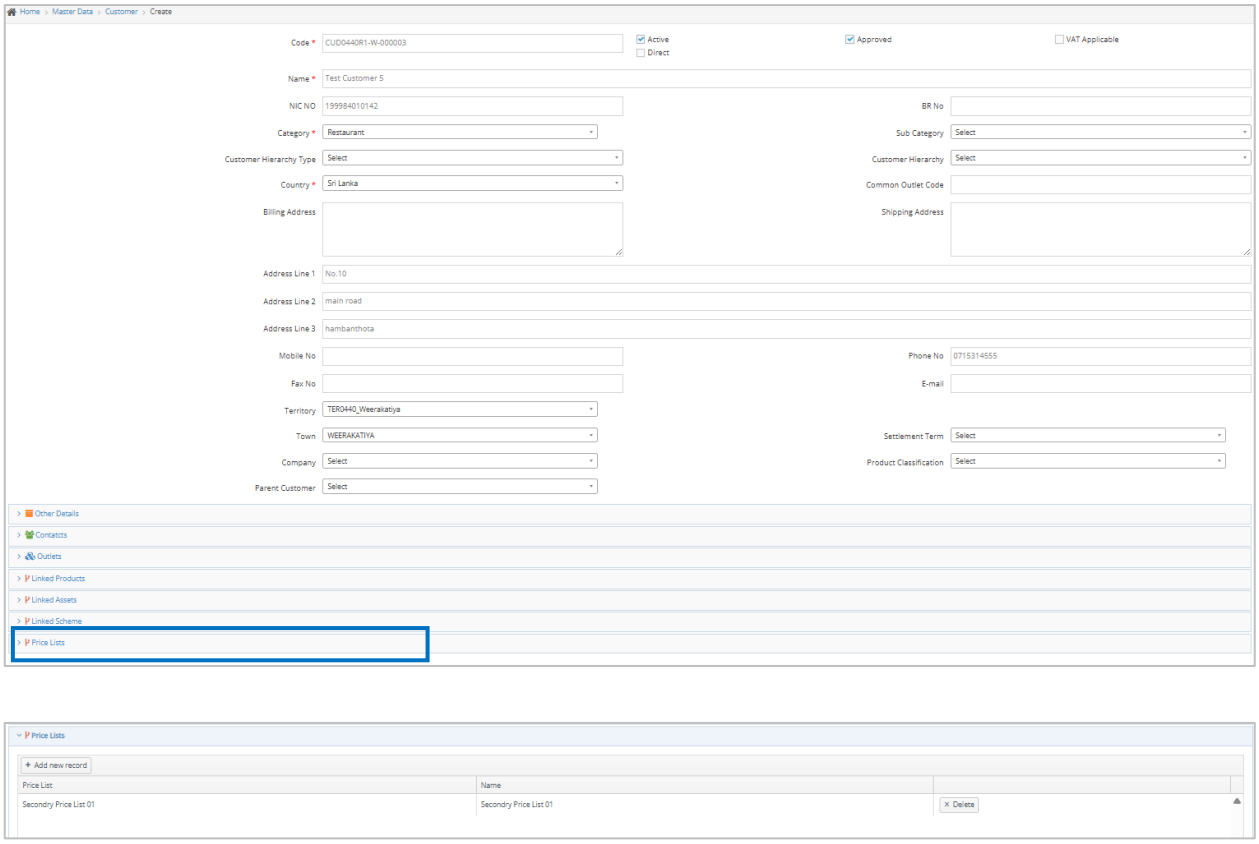

Figure 14 - 'Customer wise Price List' Assignment

- A default price list can be maintained in the system and automatically applied to all customers by default.
- in special cases where a customer is eligible for unique pricing, a custom price list can be created and attached directly to that customer's profile.
- This ensures that all future transactions for the customer automatically reflect the agreed-upon prices without any manual adjustments.

12. Discount Scheme Assignment – Level Wise

- Discounts can be assigned in the SFA backend based on sales hierarchy levels and customer hierarchy levels.
- This allows to automatically apply the relevant discounts to the respective reps or customers during the sales order and sales invoice process.

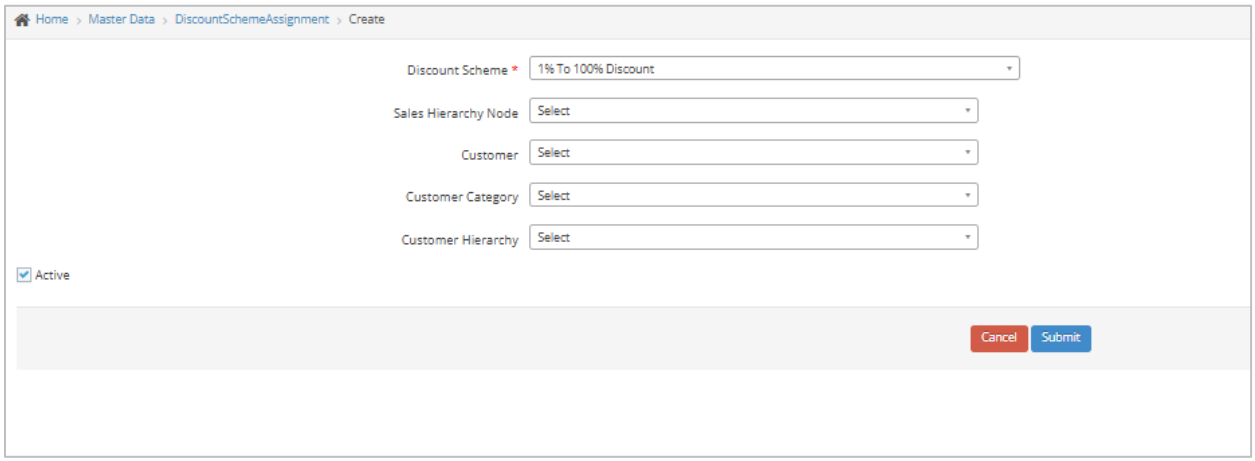

Figure 15 - Discount Scheme Assignment

13. Month End Process

- The SFA system includes a **Period End Process** to ensure all transactions for the last month are properly completed.
- If there are any **incomplete transactions**, users will see the Month End Process Check List interface, as shown in the image.

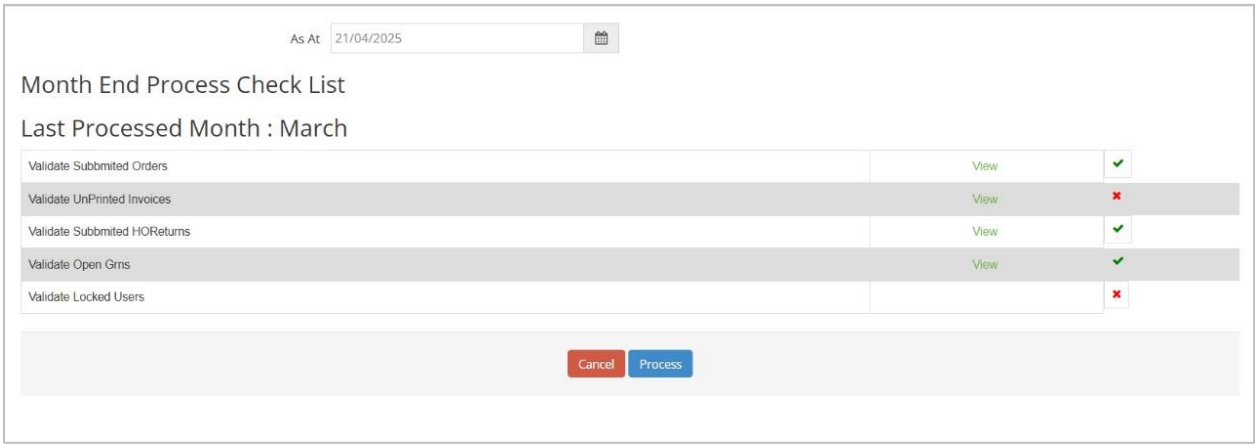

Figure 16 - Month End Process

18. Monitoring Employee Visits/Sales

- This report provides a summary of daily field activities conducted by sales representatives. It captures each rep's login/logout times (D_ON/D_OFF), visited retailers, activity codes, and location details including route, GPS coordinates, and battery level. The report also indicates the GPS status during their visits. Each rep's activity is grouped under their name for better readability.
