TABLE OF CONTENTS

01. Customer Approval 3

02. Duty On and Duty Off 3

03. Change Plan Route 3

04. Leave Management 3

05. Discount Approval 4

06. Purchase Order (PO) 4

07. Stock Adjustment 4

01. Customer Approval

- The Sales Rep registers a new customer through the app.
- The admin or an authorized approver (ASM) reviews the customers' details under the 'Pending Approval Request All' section (Type: Customer Approval) in the backend system.
- Admin or an authorized approver (ASM) can either approve or reject the customer.
- Once approved, the sales rep receives a notification in the SFA app confirming the customer approval.
- Then the transactions can be carried out for that customer.

02. Duty On and Duty Off

- When a Sales Rep marks themselves as 'Duty On' or 'Duty Off', an SMS is sent to the relevant Area Sales Manager (ASM).

03. Change Plan Route

- The Sales Rep can make a route plan change request through the app.
- The admin or an authorized approver (ASM) reviews the route details under the 'Pending Approval Requests All' section (Type: Route Plan Approval) in the backend system.
- Admin or an authorized approver (ASM) can either approve or reject the route plan request.
- Once approved, the Sales Rep receives a notification in the SFA app confirming the route plan approval.
- Then the Sales Rep can then access the approved route.

04. Leave Management

- The Sales Rep can request a leave through the app.
- The admin or an authorized approver (ASM) views the leave request details under the 'Pending Approval Requests All' section in the backend system.
- Admin or an authorized approver (ASM) can either approve or reject the leave request.
- Once approved, the Sales Rep receives a notification in the SFA app confirming the leave approval.

05. Discount Approval

- The admin team defines a maximum discount percentage for selected products.
- If a Sales Representative requests a discount that exceeds the defined limit (e.g., more than 10%), the approval process is triggered.
- In here, the ASM receives an SMS to their mobile phone.
- An authorized approver (ASM) reviews the discount details under the 'Pending Approval Requests All' section in the backend system.
- Admin or an authorized approver (ASM) can either approve or reject the discount request.
- Once approved, the Sales Rep can apply the approved discount to the invoice.

06. Purchase Order (PO)

- The distributor creates a purchase order (PO).
- The PO is sent to the client's ERP system through system integration.
- The corresponding stock is then transferred to the SFA system.
- In the SFA system, the distributor can either accept or reject the received stock.

07. Stock Adjustment

- The distributor makes a stock adjustment request.
- An authorized approver (ASM) reviews the stock adjustment details under the 'Pending Approval Requests All' section in the backend system.
- Admin or an authorized approver (ASM) can either approve or reject the stock adjustment request.
- Once approved, the distributor can proceed with the stock adjustment.
