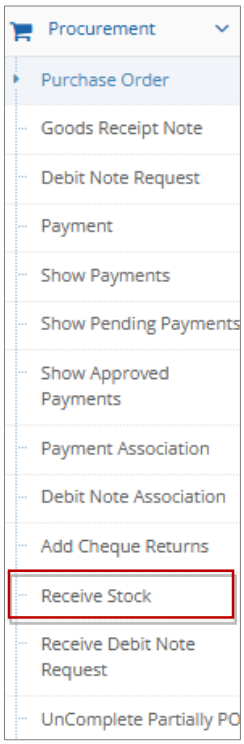
1. Primary Sales Process

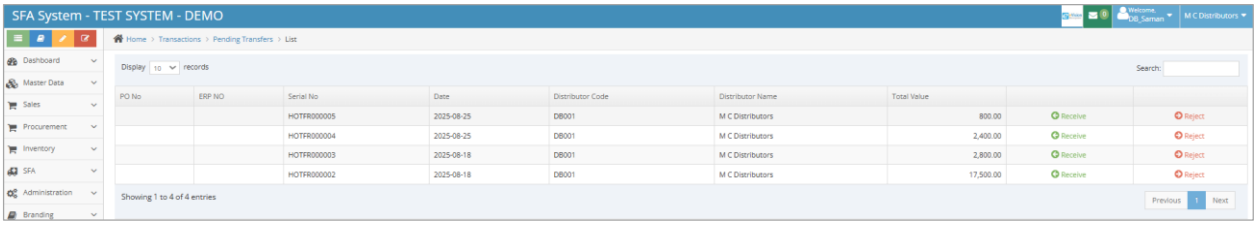
- As agreed during discussions, the Purchase Order (PO) process will not be used within the SFA system.

1.1. Stock Receive Process (PO to GRN)

- The process will start once the distributor **receives the stock** in the SFA system.
- The Head Office will initiate the stock transfer by uploading the relevant stock details through an Excel-based upload.

Path: - Procurement → Receive Stock





- The distributor can choose to receive the stock **completely or partially.**

To Receive Full Stock:

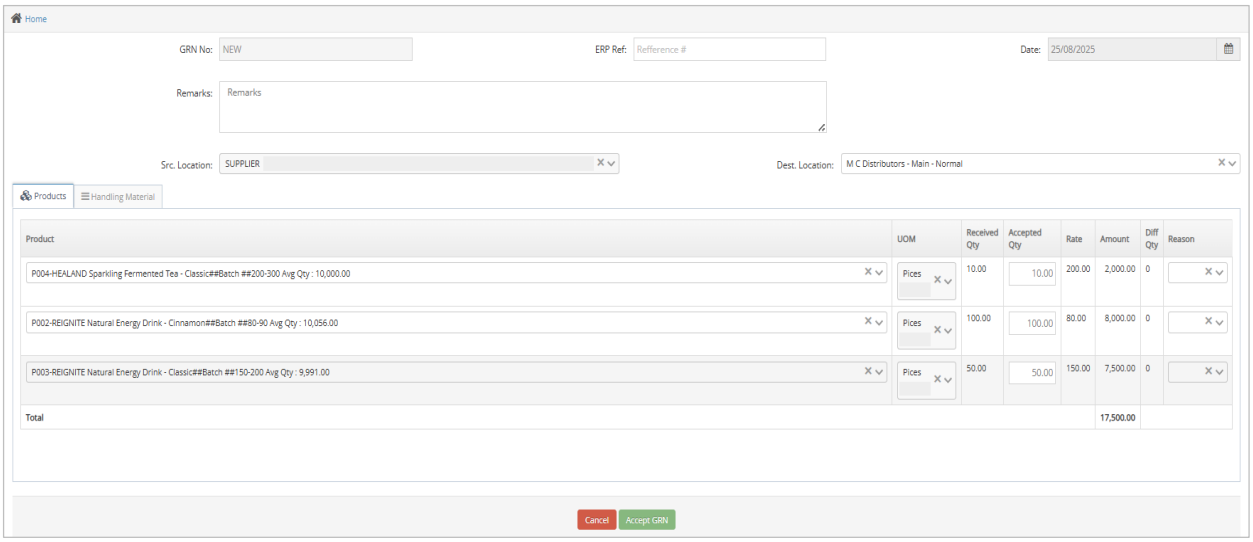
- If you (Distributor) choose to receive the **full stock**, you can click the **'Receive'** button to load all stock details and then click **'Accept GRN'** to complete the process.

- Once confirmed, the entire stock quantity will be converted to a **GRN (Goods Received Note)** and automatically added to the Distributor's Main Warehouse inventory, ensuring accurate and updated stock levels.

To Receive Partial Stock:

- If you (Distributor) choose to receive only a **partial quantity of the stock**, you can click **'Receive'**, adjust the Accepted Qty, **select a Reason for partial receipt**, and then click **'Accept GRN'** to finalize the process.

- The accepted quantity will be converted into a GRN and automatically added to the Distributor's Main Warehouse.

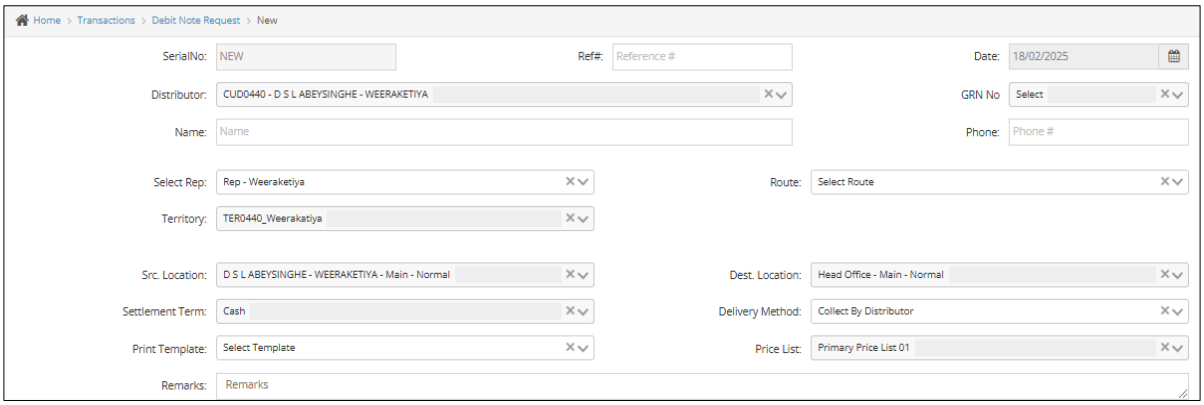


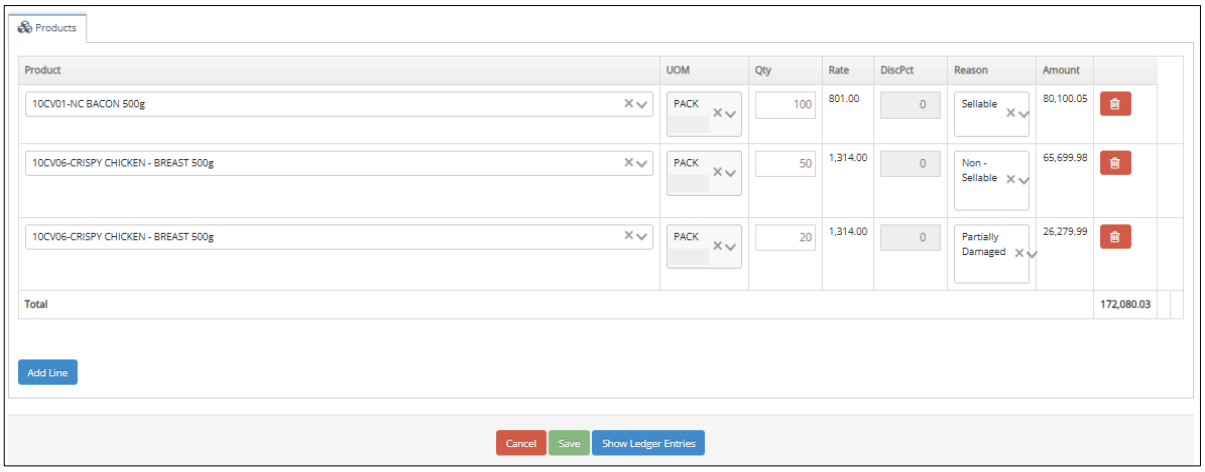
2. Primary Returns

2.1. Debit Note Request

- Debit note request will be generated for the **rejected stock quantities**.
- Head office user can either accept or reject the request.
- If accepted, it will convert to the **Purchase Return Debit Note.**

Path: Procurement → Debit Note Request



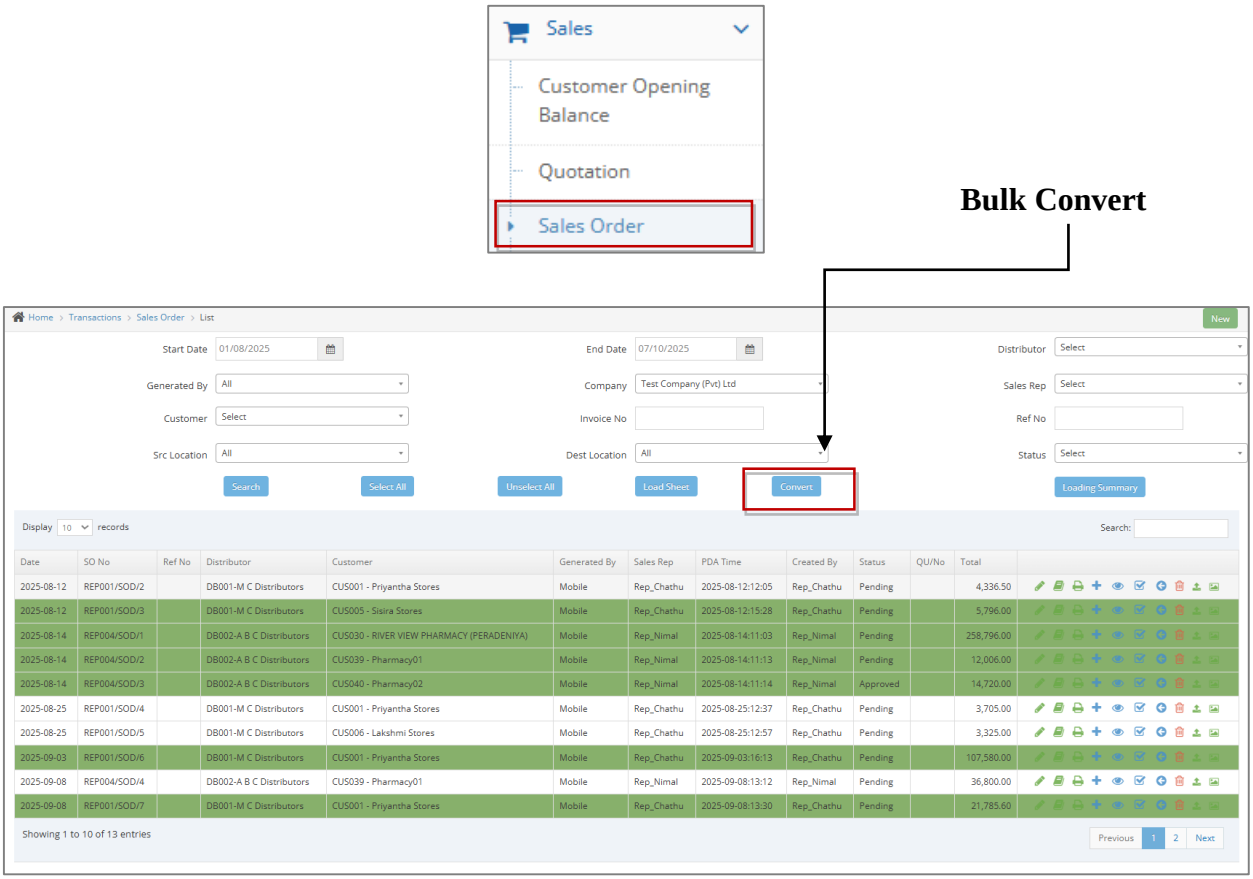


3. Sales Order to Direct Sales Invoice conversion process

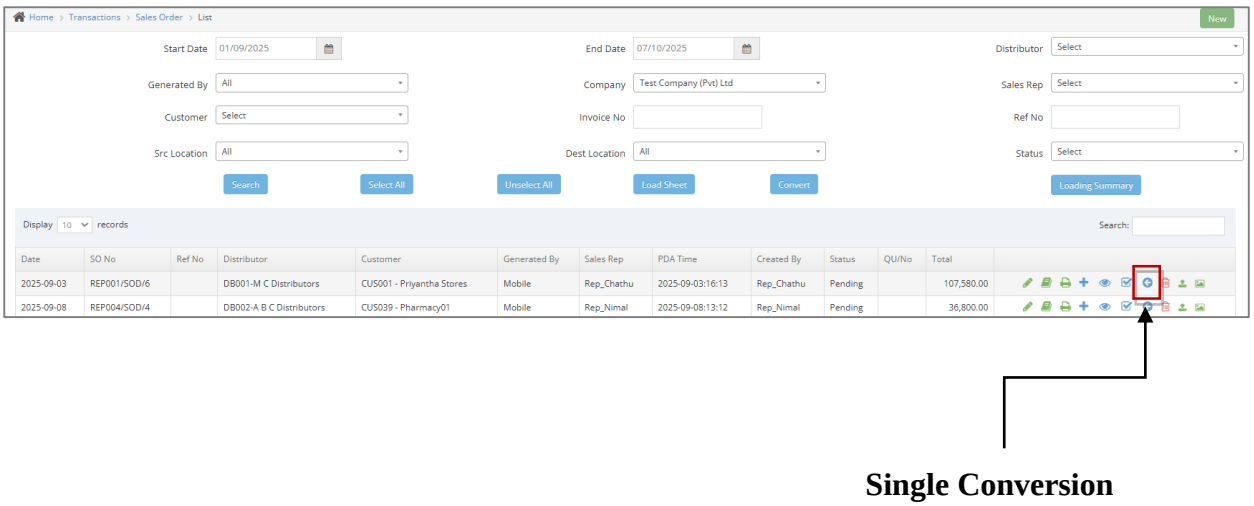
- There are two methods to convert the Sales Order to Direct Sales Invoice.

1. Bulk Convert Option

Path: - Sales → Sales Order



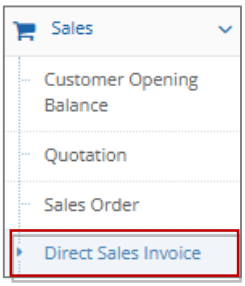
2. Single Conversion Option



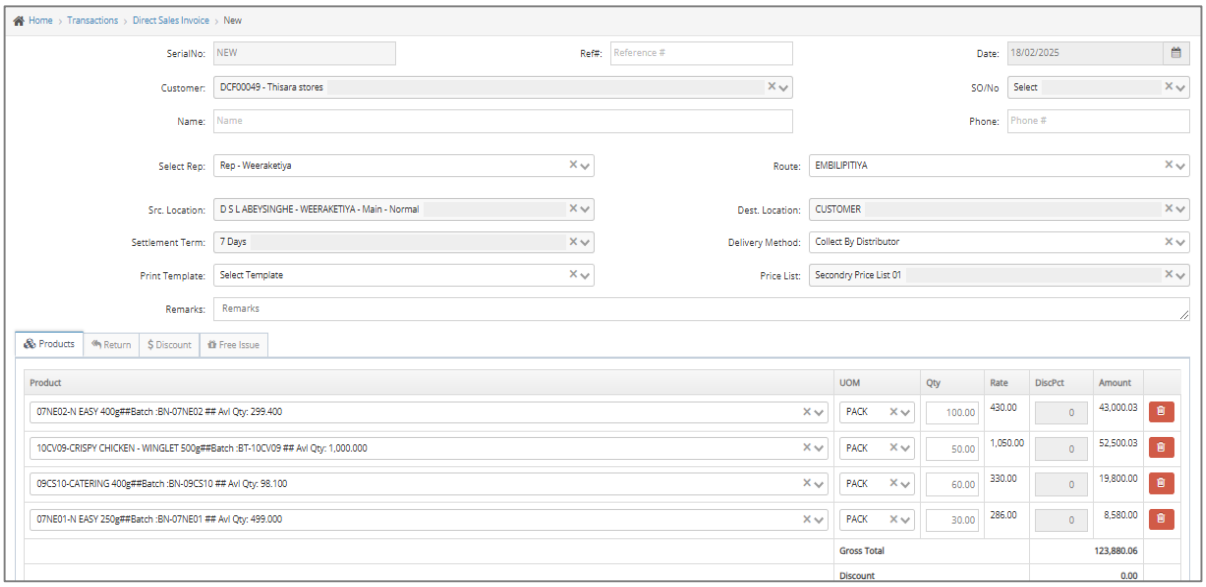
4. Direct Sales Invoice

- Once convert the SO they can see under the Direct sales invoice menu.

Path: - Sales → Direct Sales Invoice



- To generate a Direct Sales Invoice, you need to select the Customer Sales Order Number (if applicable), Sales Rep, Route, and Price List.
- After selecting these details, you need to the products and quantities to the invoice.
- By clicking the Calculation button under the Discount tab, the system automatically applies any eligible discounts and free issues. Once all details are verified, you can save the invoice to complete the process.



5. Secondary Returns

5.1. Return Request

- The system should support handling secondary sales returns initiated from the SFA mobile app.
- You can make **Return Requests** through the **SFA Mobile App.**

PROCEED TO CHECKOUT

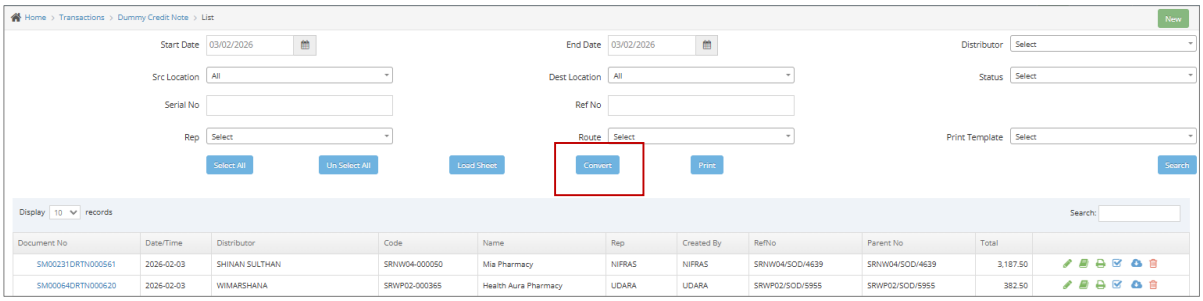
- Both good returns and damaged returns are captured in this module.
- Separate return invoices can be generated through the mobile app. If there are price batches salesperson can select the price and add the return.
    - Select Product.
    - Select Quantity
    - Select Return Reasons.

      Return Reasons can be predefined from the head office.
    - Select MRP
    - Rep can enter the discount manually while taking return.
    - Product tile wise heading indicates yellow color mark, its product has free issue or discount scheme.
    - Select (←) left-hand top corner.
    - The Sales invoice Print Out format should be provided by Customer.

5.2. Dummy Credit Note

- When the sales rep creates a Return Request through the mobile app, it should be displayed in the **Dummy Credit Note** in the SFA system.
- Here, the distributor selects the relevant **Src. Location** and then clicks the **Convert** button.

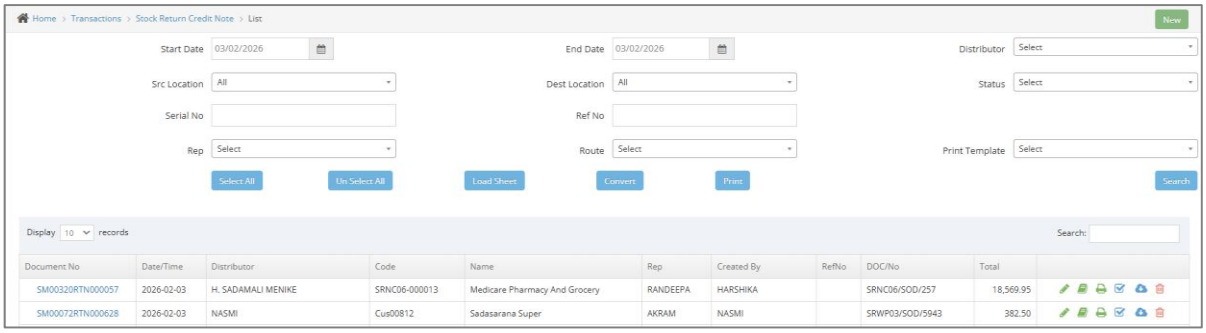
Path: Sales → Dummy Credit Note



5.3. Stock Return Credit Note

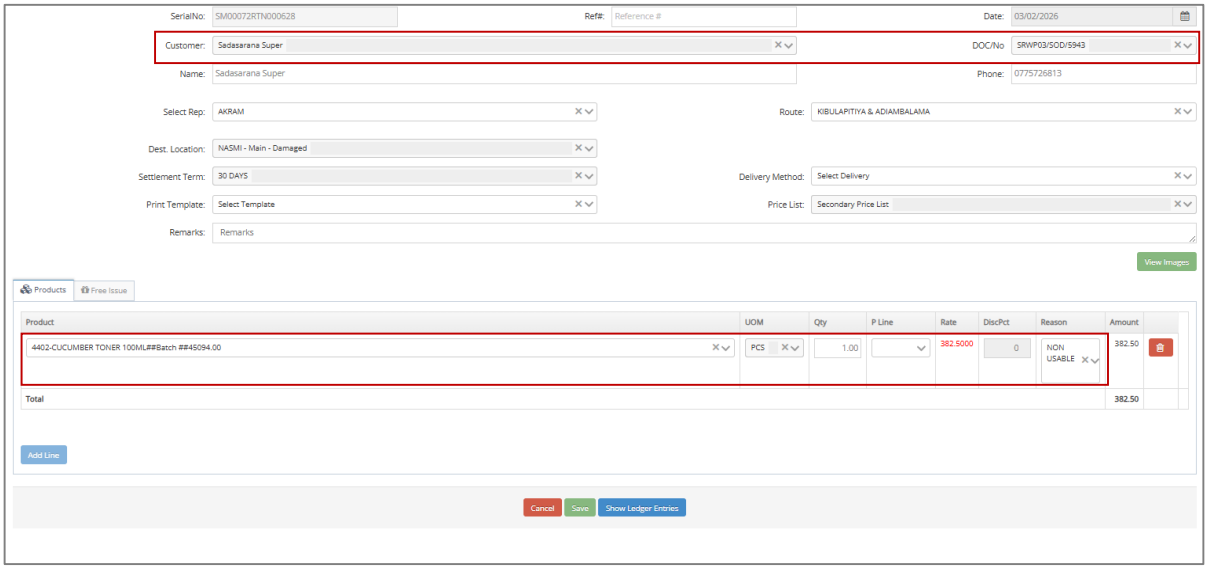
- After the distributor select the **Dummy Credit Note**, and converts it, the system will automatically generate the **Stock Return Credit Note**.
- To **select previous stock return credit notes** the user should select the **Start Date, End Date and select the Search button**. Then, the system will show a list of invoices, which belongs to the selected date range.

Path: Sales → Stock Return Credit Note



5.3.1. New Stock Return Credit Note

- The distributor can also create a **Stock Return Credit Note** (invoice-based returns only) through the **SFA system**.
- To raise the **new stock return credit**, note the user should click on the **New button**.
- Then the system will direct to the new credit note adding screen.
- To create the 'stock return credit note' by **referencing an invoice** the user should first select the **Customer** and then select the invoice number from **DOC/No** filed.
- Then the system will display all the products, which are relevant to the selected invoice, and the user can amend them and save the stock return credit note by selecting the **Save** button.



- When creating the stock return credit note by referencing the invoice, the system will automatically deduct the return note amount from the outstanding.

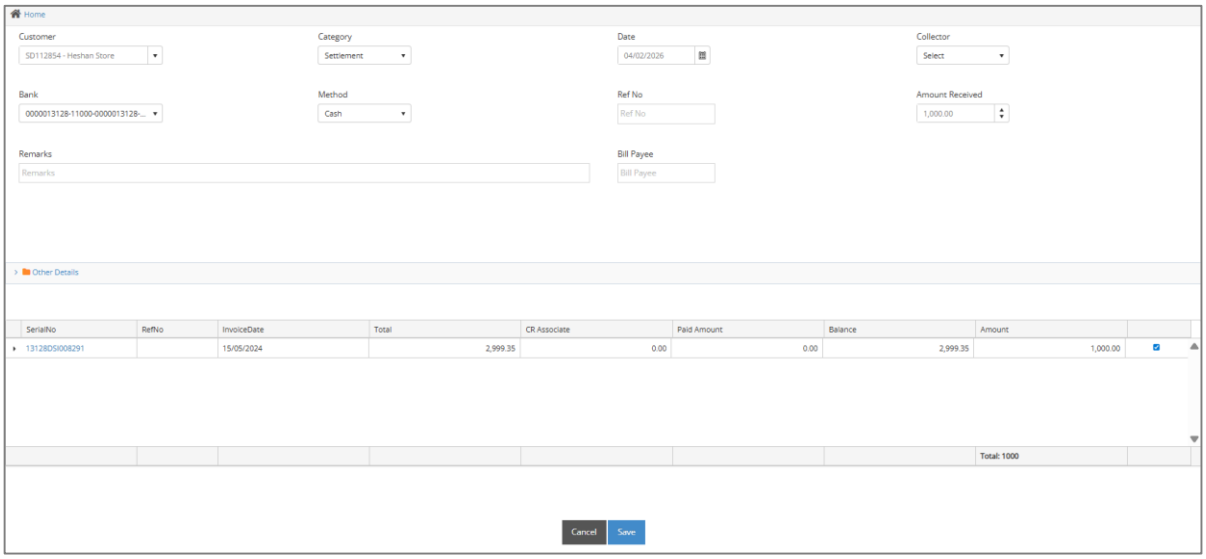
6. Receipts

- Receipts are used to **enter the payments**. You can enter both Cash & Cheque payments.

Path: - Sales → Receipt

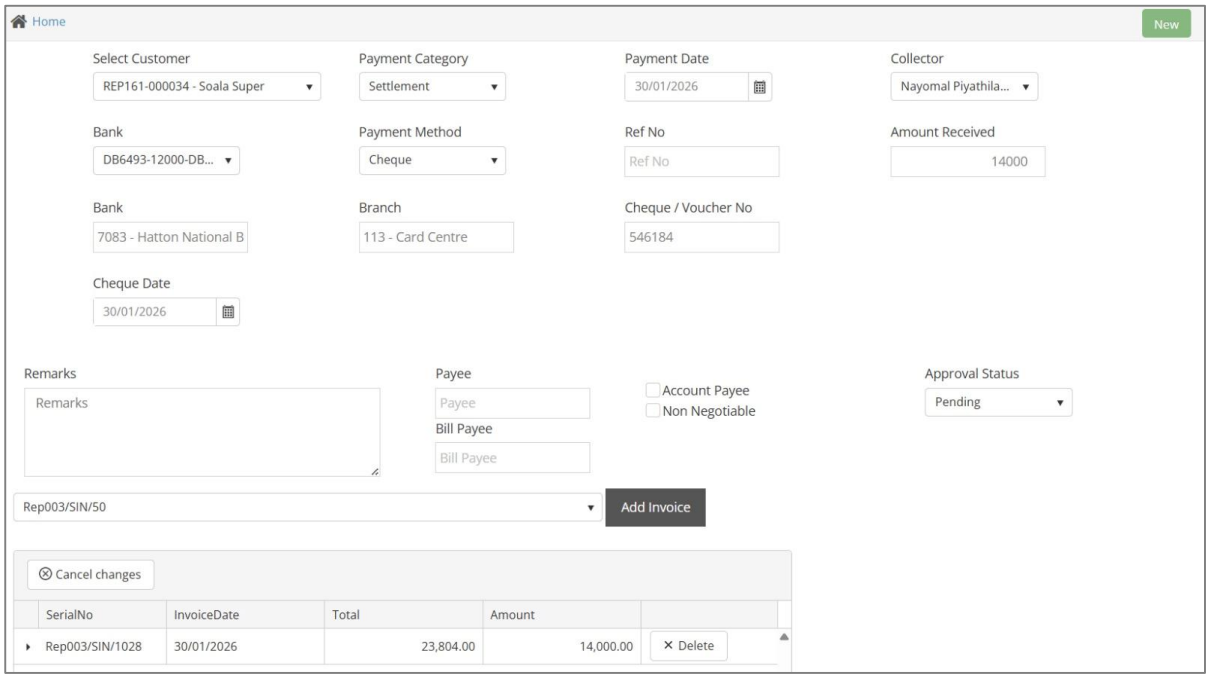
6.1.Cash Payments

- Select the **Customer**. Then click on **"Settlement"** in the drop down of the **Category** dropdown.
- Then all the outstanding invoices will display at the bottom grid.
- Then select **"Cash in Hand"** according to the payment method in **Bank** dropdown.
- After that user must select the **payment method** as **"Cash"**. Then type the **cash amount** in the **"Amount Received"** text box.
- Then tick on check box after the Amount column and you can **type the settlement amount** invoice wise and finally click on **"Save"** button.



6.2. Cheque Payments

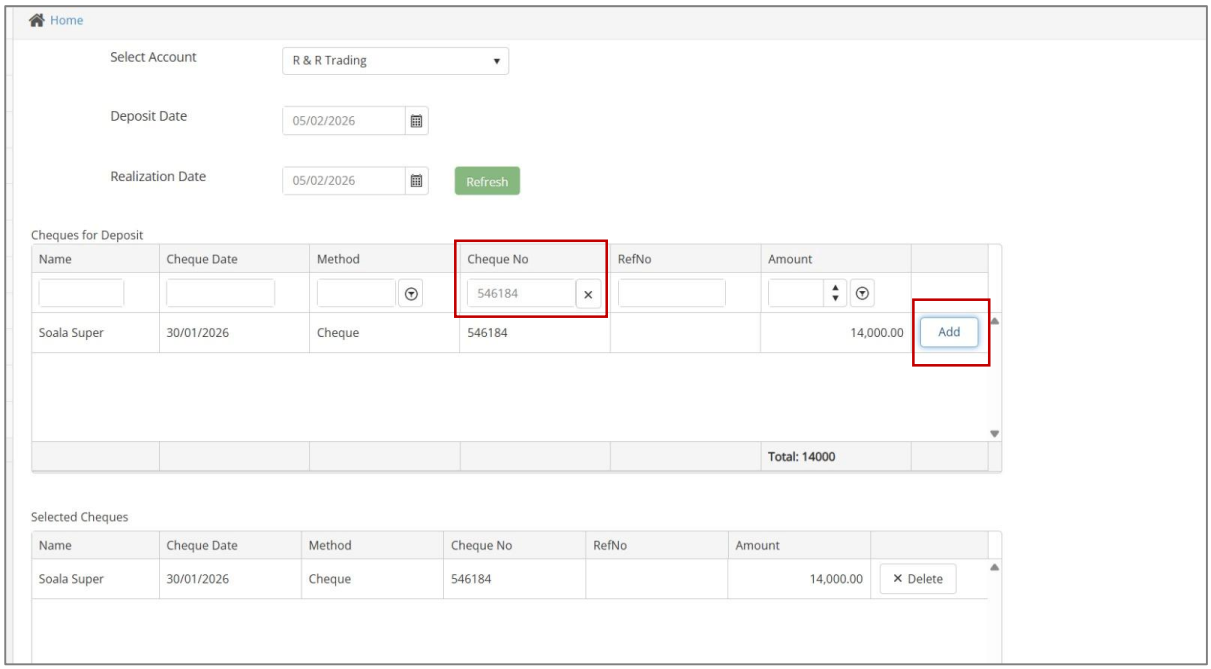
- Select the **Customer**. Then click on **"Settlement"** in the drop down of the **Category** dropdown.
- Then all the outstanding invoices will display at the bottom grid.
- Then select **"Cheque in Hand"** according to the payment method in **Bank** dropdown.
- After that user must select the **payment method** as **"Cheque"**. Then type the **cheque value** in the **"Amount Received"** text box.
- For **Cheque payments** user must type **Bank name, Branch name, Cheque/Voucher No** & has to select **Cheque date** in the calendar.
- Finally click on **"Save"** button.



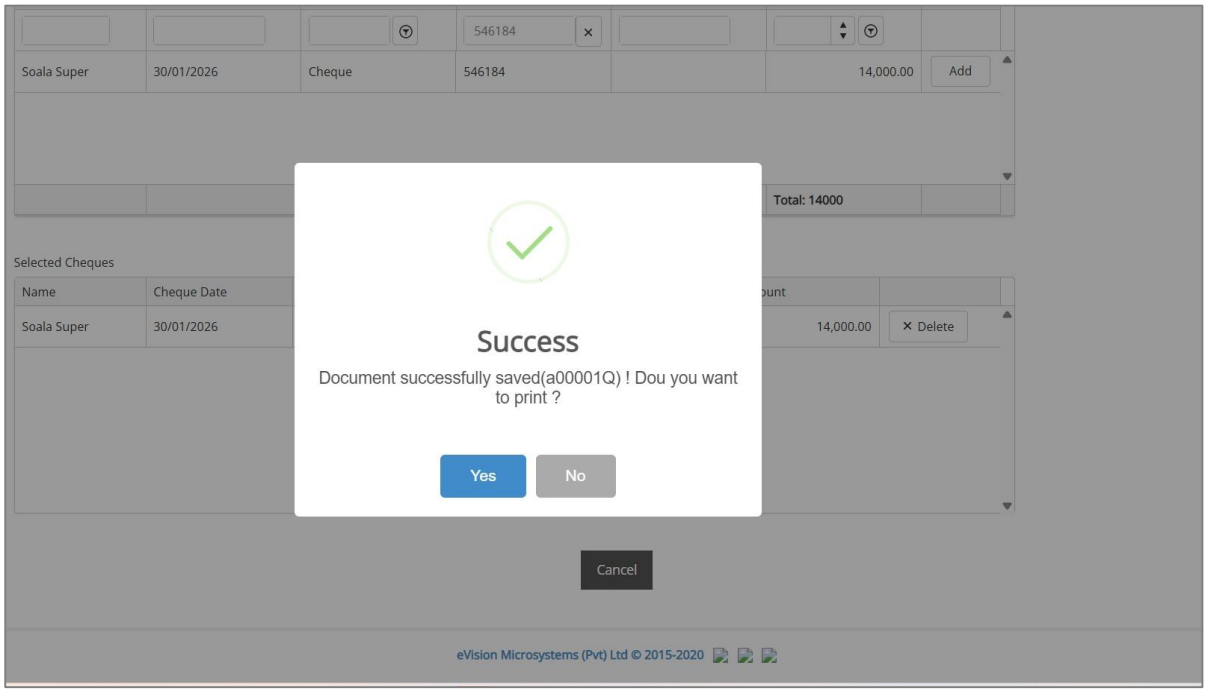
6.3. Cheque Deposits

- Select the **Account** using the **"Select Account"** field.
- Then all the cheque receipts will display at the **Cheques for Deposit grid.**
- Also, select the Cheque Deposit Date in the **"Deposit Date"** field.
- Then select **relevant Cheque Receipt** using the **"Cheque No"** field.
- After that user will click the **"Add"** button and then the relevant cheque receipt will be displayed in the **Selected Cheques grid**.
- Finally click on **"Save"** button.

Path: - Accounts → Deposits



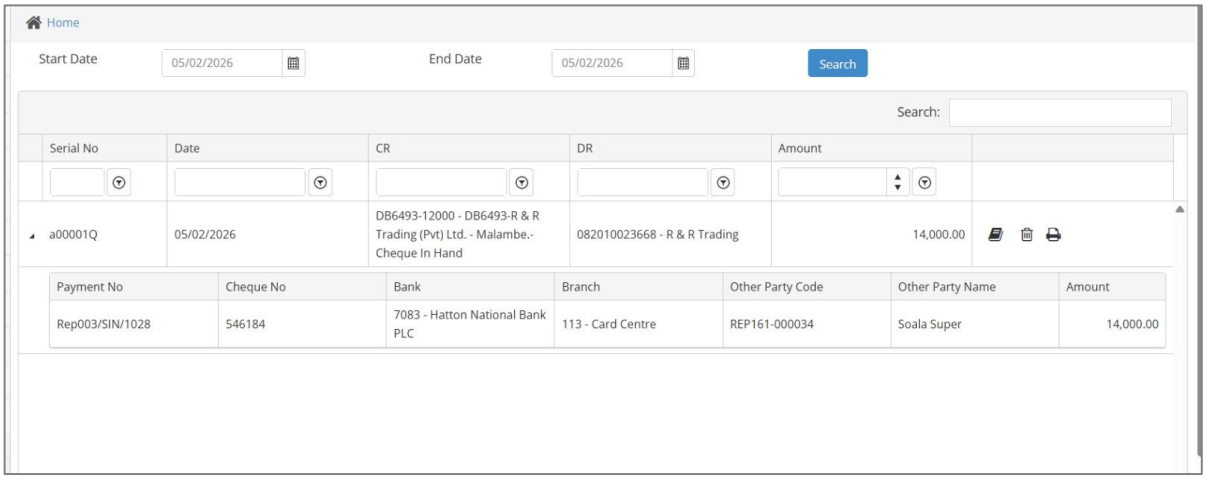
- Then user can display successfully saved the cheque deposit.



6.3.1. Show Deposits

- User can display all the cheque deposit lists using the **"Show Deposits"** option.

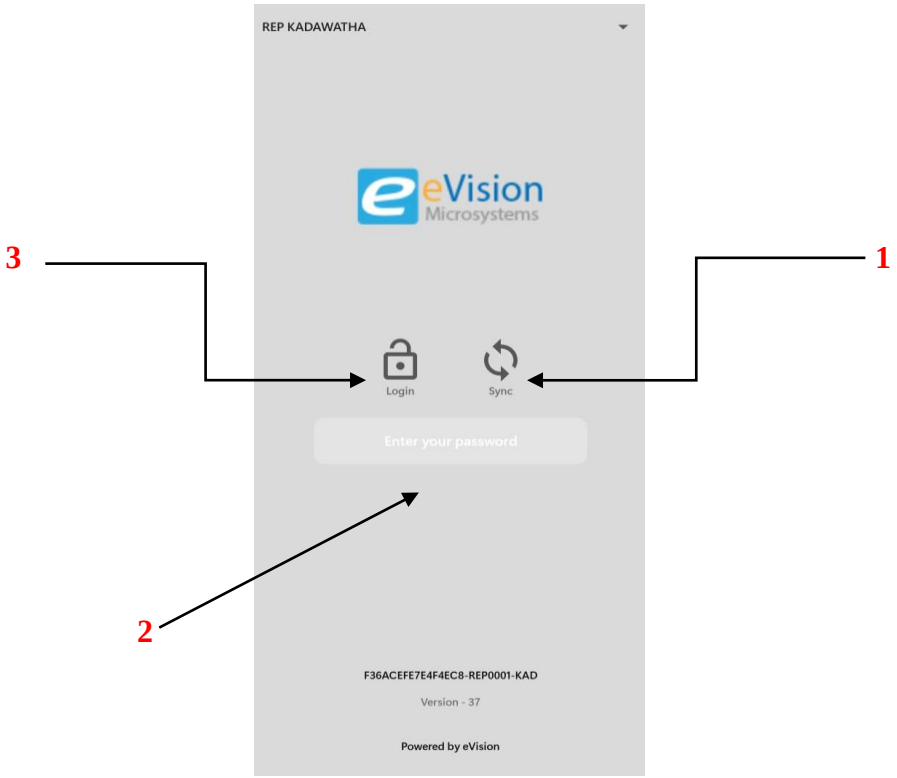
Path: - Accounts → Show Deposits



7. Secondary Sales Process

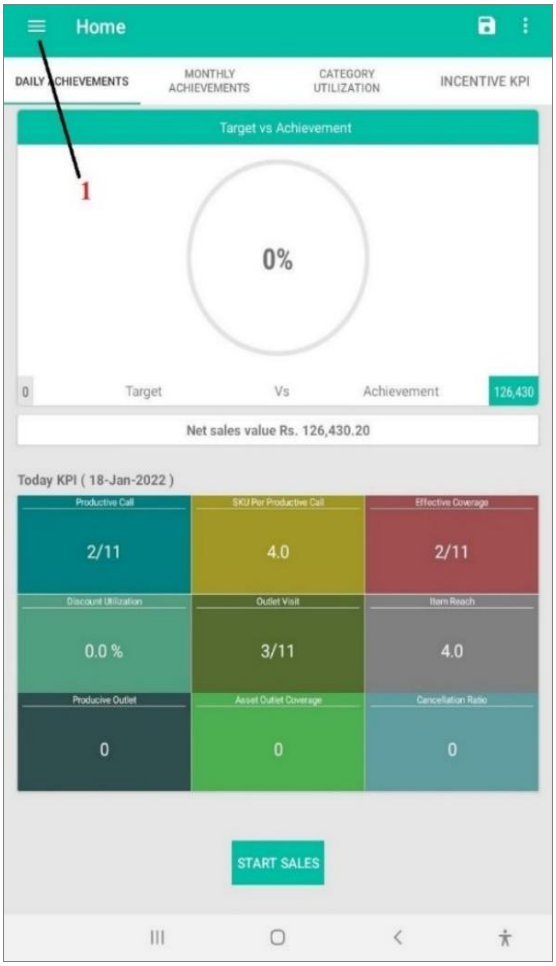
1. Logging in to the app

- The first step of logging in to the App is data sync.
- To sync the data the user should press the **'Sync' (1)** icon.
- Once synchronization is 100% completed, the user should enter the password in the **'Enter your password' (2)** field.
- Then the user should select **'Login' (3)** to enter the App.

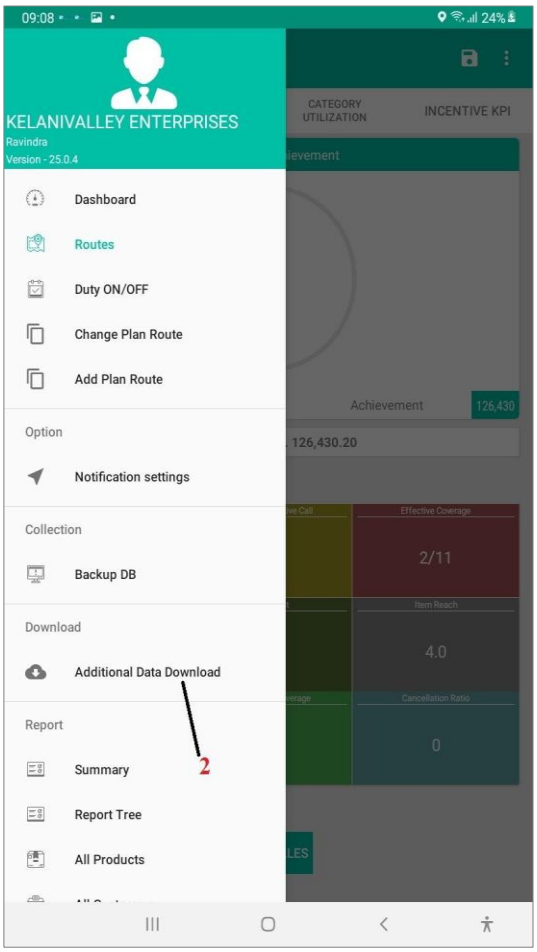


2. Additional Data Download

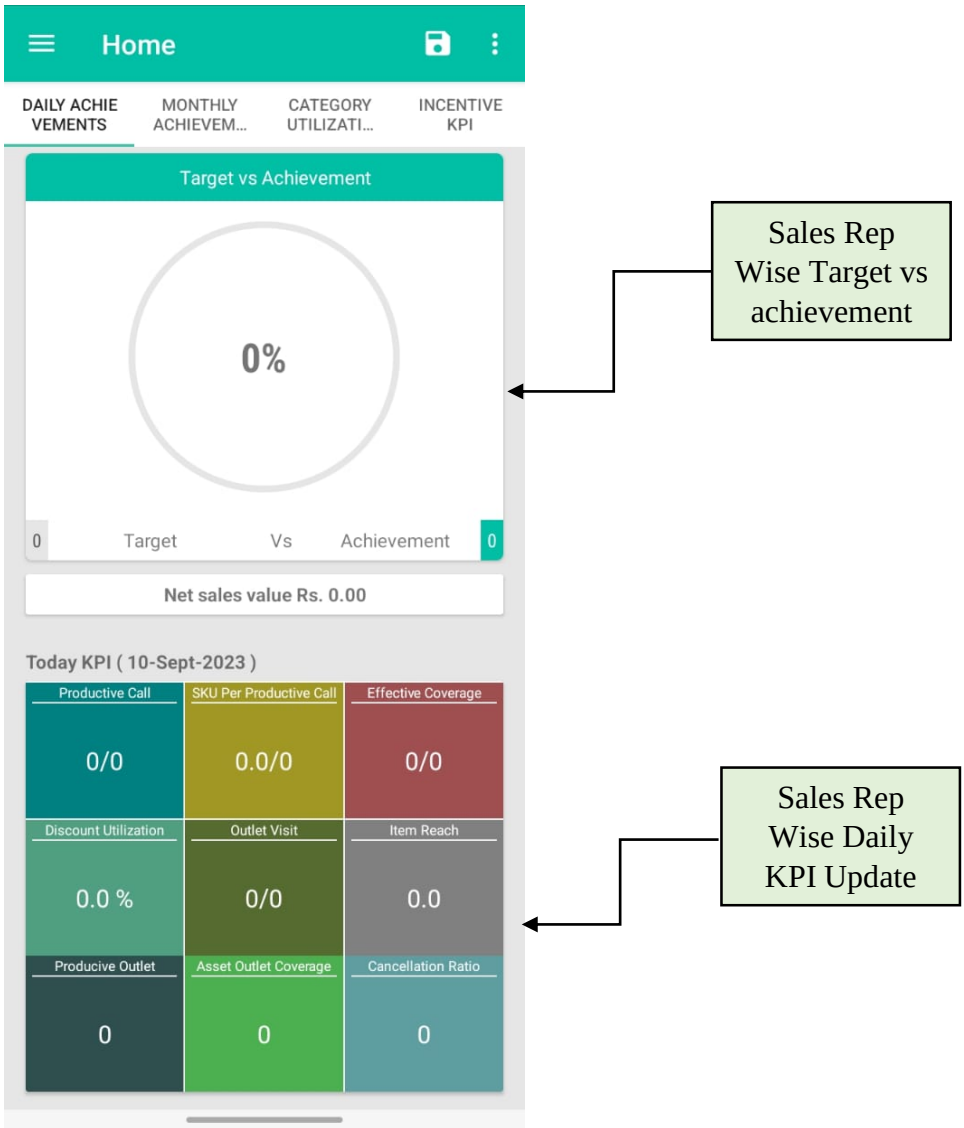
- Once logged in to the app the following screen will be visible to the user.
- In order to do the **additional download**, the user should select the highlighted icon in the following image.



- Once it has been selected the following side menu will appear. On that side menu, the user should select the **'Additional Data Download' (2)** icon.



3. View Dashboard



- This part of the dashboard shows the daily target achievement and Daily KPIs.
- The target amount can be set out from the back end of the system.
- The left bottom corner of the dashboard shows the target amount, and the right bottom corner shows the achieved amount.
- The speedometer shows the achieved amount as a percentage.

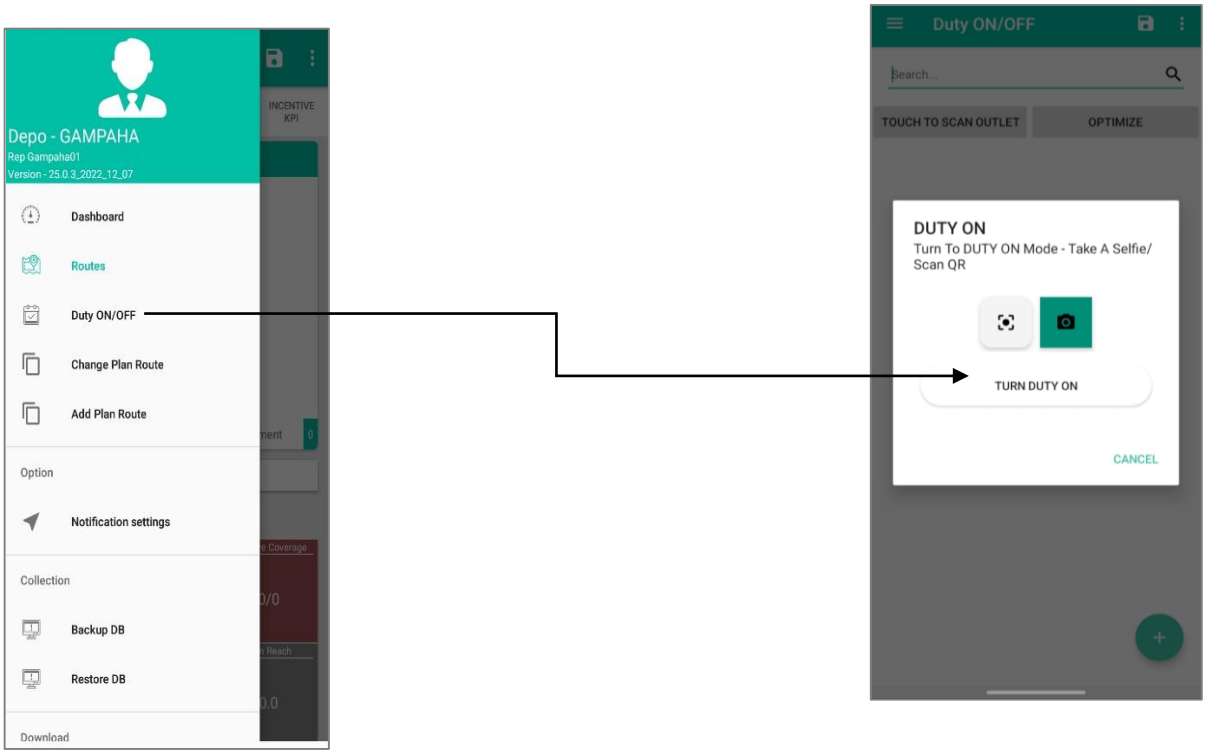
❖ **Productive call** - In this tile the system will capture the actual number of productive calls against the daily target for the productive calls.

❖ **SKU per productive call** - Actual number of SKUs per productive call against given per day target for SKU per productive call.

❖ **Outlet Visit** – In this tile, the sales rep visited the total outlet count on the working day.

4. Duty On/Off

- Then the salesperson should select the **duty on the button and capture the selfie.**
- To the Sales Rep enable the routes after this process.

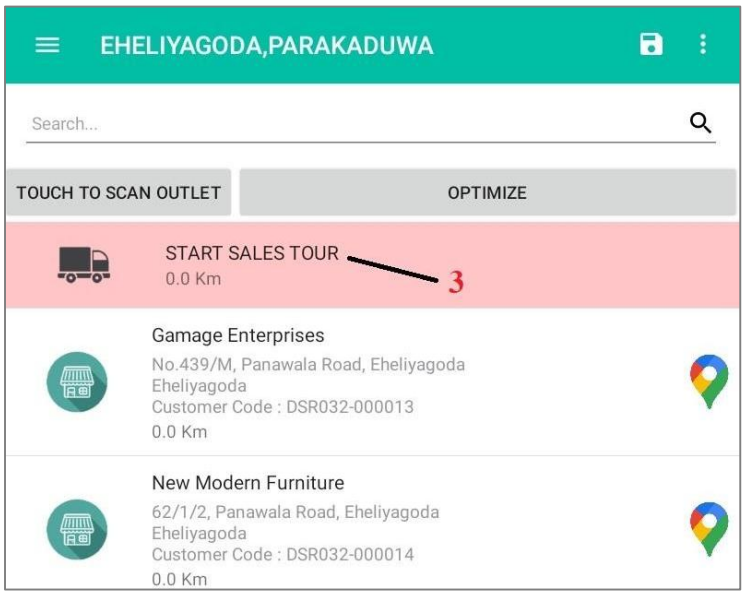


5. Start/End Sales Tour

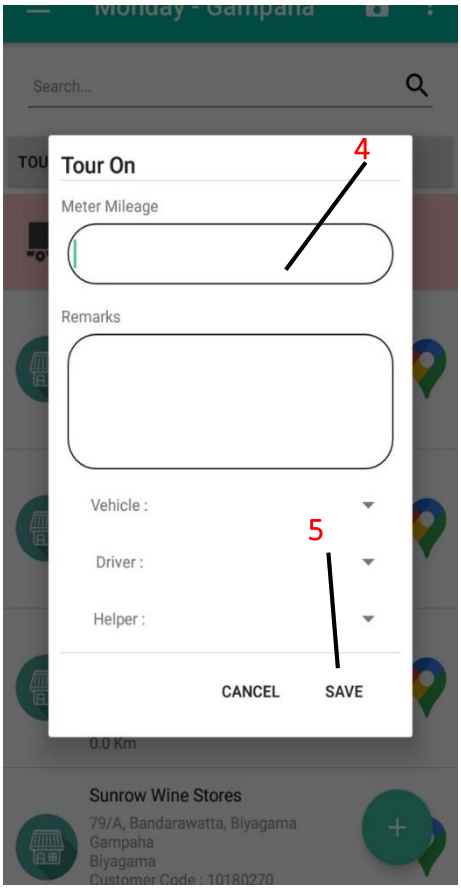
- After the above step is completed, the user will be directed to the following dashboard interface.
- In order to start the sales tour, the user should select the **'START SALES' (1)** icon.

- Then the list of routes will be visible, and the user can open the relevant route by selecting **the route name (2).**

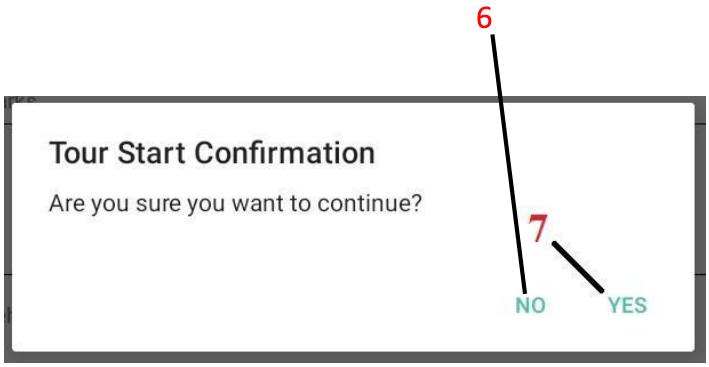
- Once the route is selected the 'START SALES TOUR' icon will appear along with the list of outlets assigned to that route. Then the user should select the **'START SALES TOUR' (3**) icon to mark the start of his sales tour.



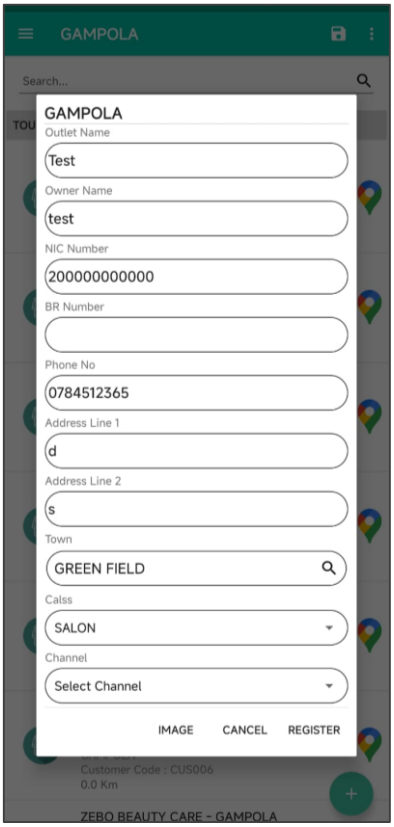
- Once selected, the following window will appear, and the user should enter the mileage mentioned in his vehicle's Odometer to the **'Meter Mileage' (4)** field.
- Then the user can select the **'Save' (5)** icon to save the added information.



- Then the following window will appear to get the confirmation, and the user should select the **'Yes' (6)** icon to confirm and continue.



6. Create a New Customer (Outlet)



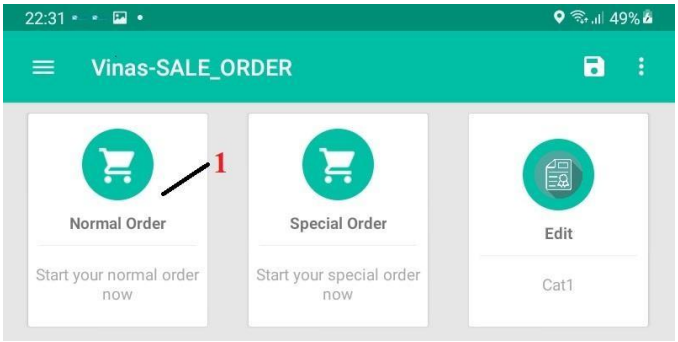
1. When there is a new customer to add to the daily route, the sales rep can click on the Green Color Circle mark on the right-hand side bottom corner of the screen. That customer will add to a particular route.
2. Then there will be a pop-up window for adding new customers.
   - **Outlet name** - Name of the outlet (Mandatory)
   - **Owner name** - Outlet Owner Name
   - **NIC number** - National identity card number of the owner
   - **Phone number** - Telephone number of the outlet or owner
   - **Address Line 1** - First line of the address
   - **Address Line 2** - Second line of the address
   - **Address Line 3** - Third line of the address
   - **Town** - Search option av Relevant town of the outlet (list of towns will be visible to select in a drop-down list) (Mandatory)
   - **Class** - Relevant category of the outlet (list of categories will be visible to select in a drop-down list)
3. In order to take the image, the user should select the **'IMAGE'** icon and then select **'REGISTER'** to save the outlet to the system.

7. Secondary Sales Related Activities

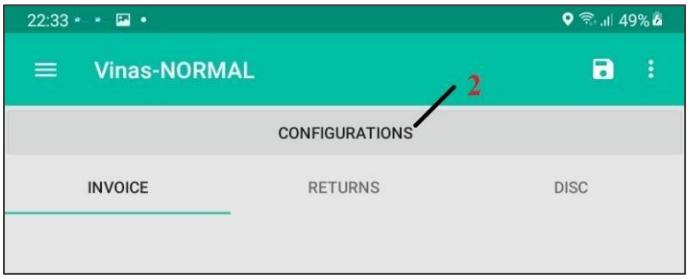
- Once the outlet is selected the user will be directed to the following interface.
- In this interface, the user can see that outlet's **last invoice date (1)**, list of **last five invoices (2)**, **list of outstanding invoices (3)** and **list of top ten purchased products (4)**.
- The **'NEXT' (5)** icon is located after this information and by selecting that the user can go to the page of activity tiles.

7.1. Pre-Sales (Sales Order)

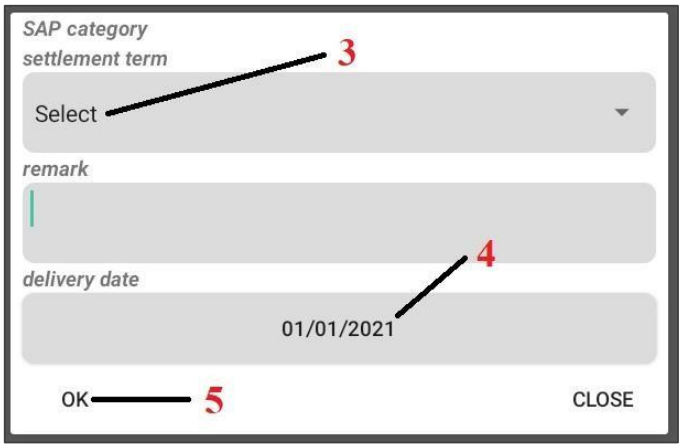
- Once the user selects the **'Pre-Sales Order' tile**, it will open another interface with three tiles and in that interface, the user should select the **'Normal Order' (1) tile.**



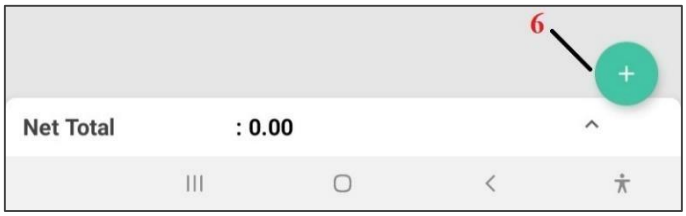
- Then it will open the sales order raising interface. In that interface, the user should select the **'CONFIGURATIONS' (2)** and it will open the settlement term and delivery date window.



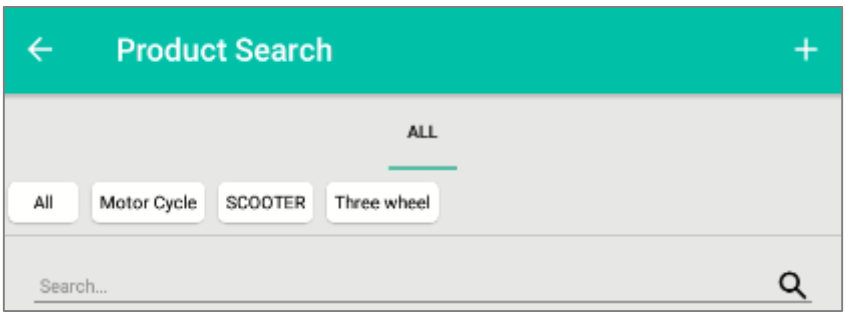
- In this window, the user should select the relevant **'settlement term' (3)** and **'delivery date'(4)**. Then the user should select **'OK' (5).** Selecting the delivery date is not mandatory. The user can continue just selecting the settlement term.



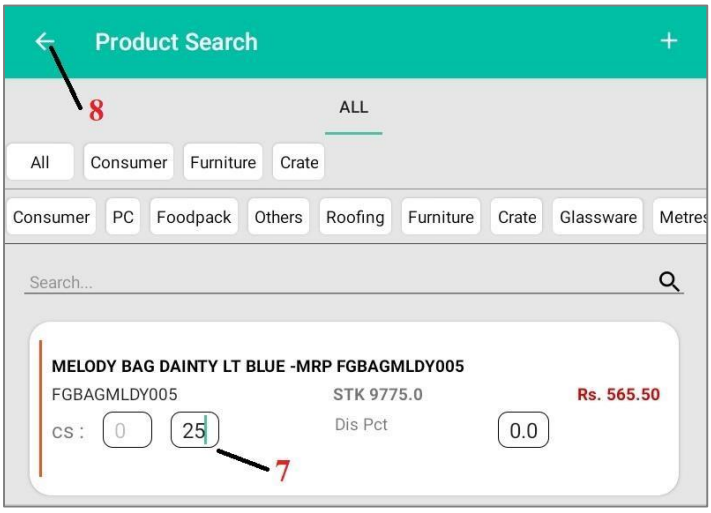
- Then the user can select the **plus mark (6) located at the bottom of the right corner.** Once selected, it will load the assigned product list to the sales order raising interface and the user can select products and enter quantities to those products.



- Once the product list is visible, using the product category filters the user can filter products and using the product search bar user can search products.



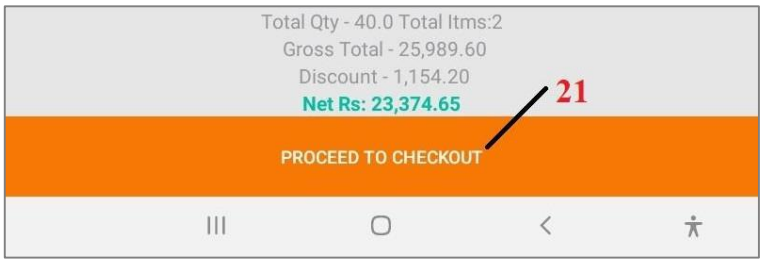
- Once the product list is opened the user can enter the required quantity of each **product (7).** Once done adding quantities to product lines, the user should select the **backward arrow (8)** located at the left top corner.



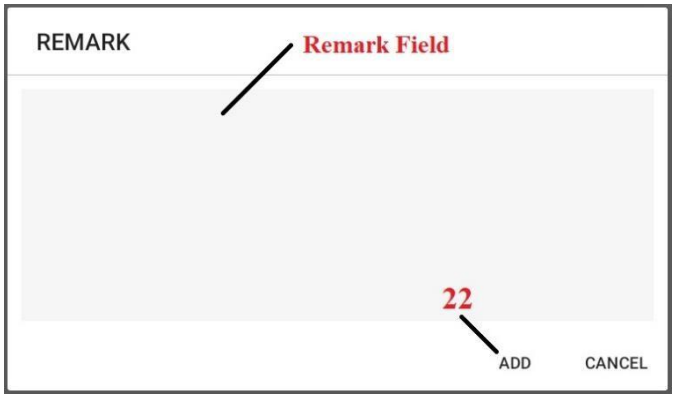
- Once the backward arrow is selected a summary of the sales order will appear as below.

- If the user needs to add a bulk discount or check whether free issues are applicable or not, the user should go to the **'DISC' tab.**

- Then the user should select the **'PROCEED TO CHECKOUT' (21)** icon to continue.



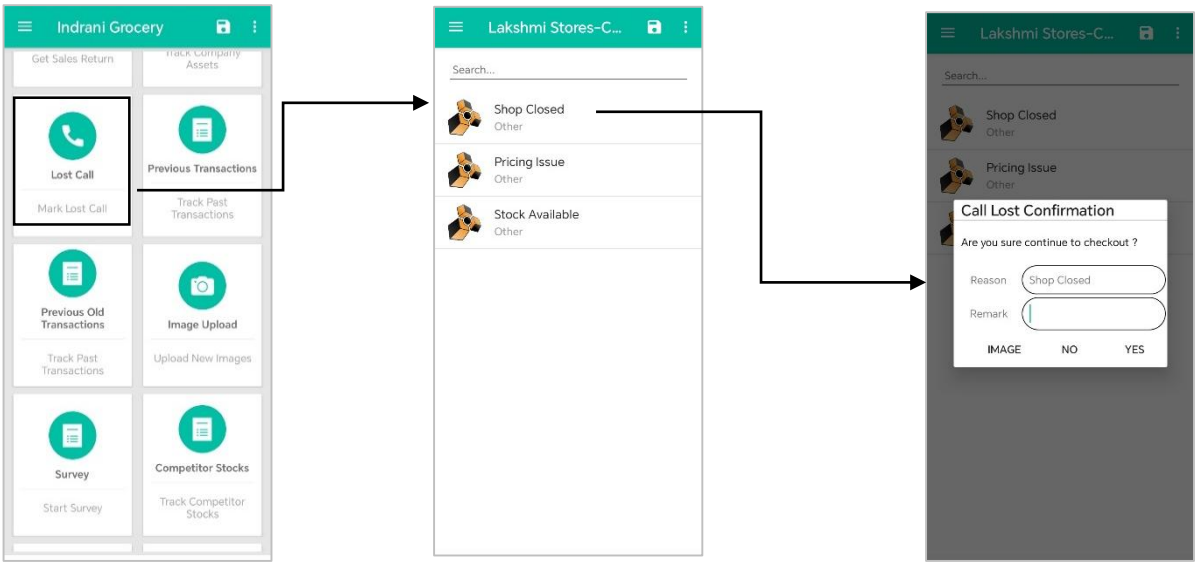
- After selecting the **'PROCEED TO CHECKOUT'** icon, the remark window will appear. In this window, the user can proceed with entering a remark or without entering a remark. Either way, the user must select the **'ADD' (22)** icon to continue.

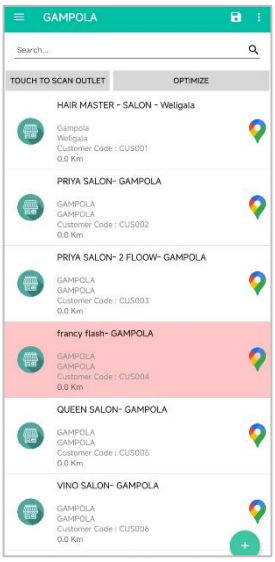


- As the last step of saving the sales order, the user should select the **'SAVE' (23)** icon. Then the **sales order will be saved to the system.**

- The productive outlets appear on the customer list in **yellow** highlighted below.

7.2. Call Lost



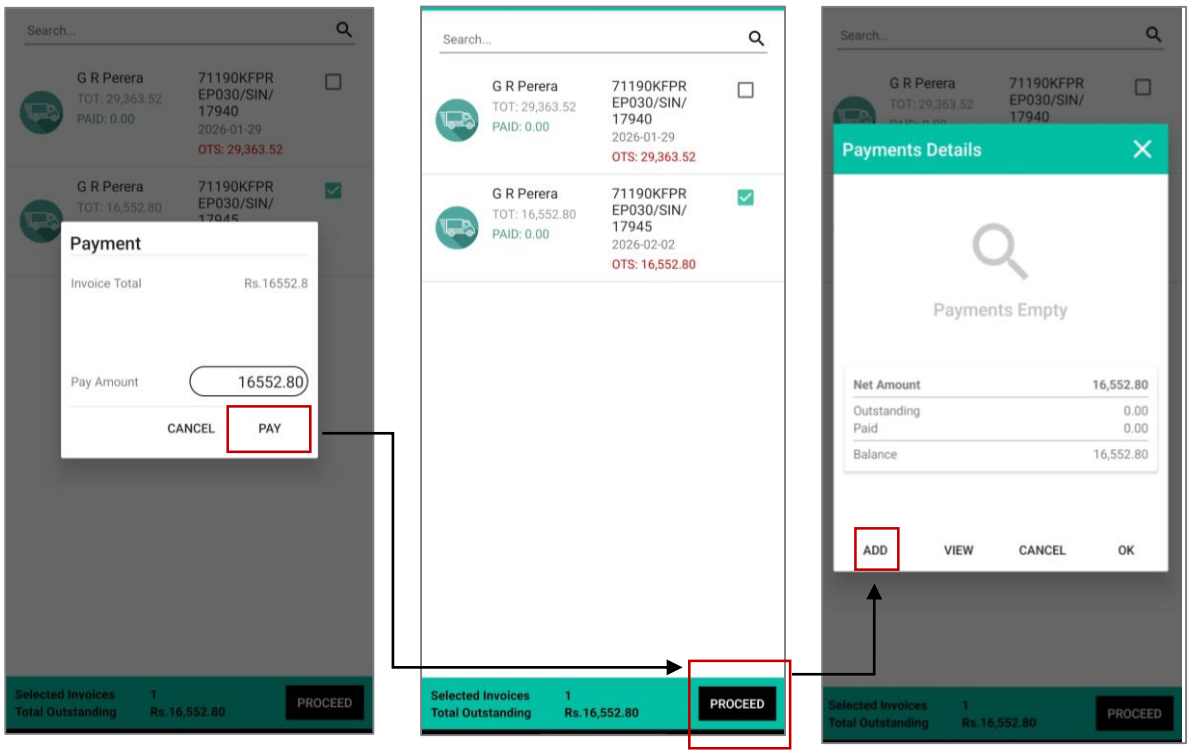


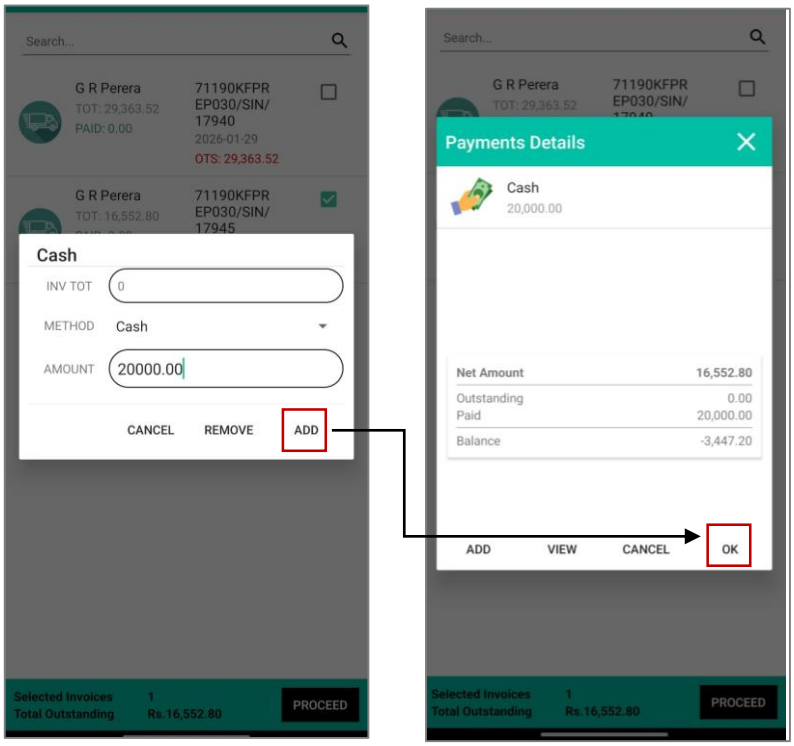
- Sales Rep can mark his lost call information at the shop using the **'Lost Call'** option.
- He needs to select the reason from the **pre-defined reasons** for the lost sale and mark the lost call.
- After call lost, the outlet highlights **Dark Pink Color**. These reasons can be set up from the back end.

7.3. Outstanding Invoices

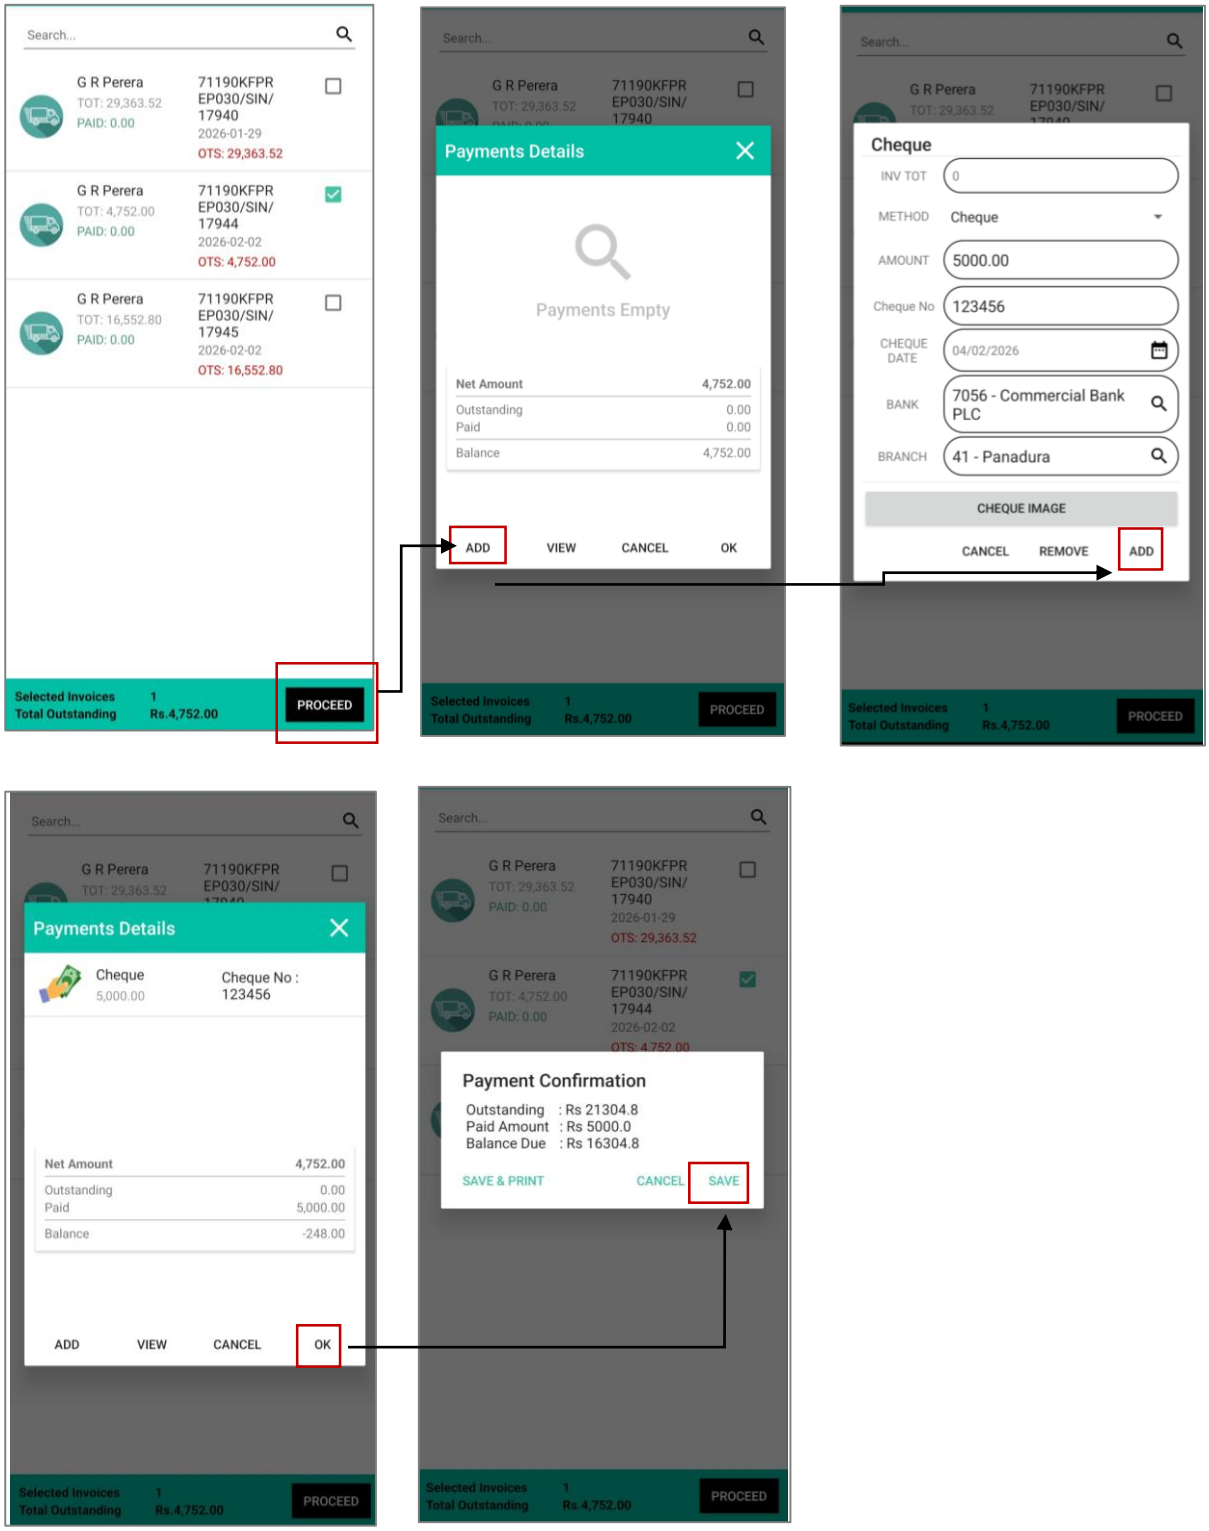
- The user can view the outstanding invoices that were raised against the customer.
- The Rep user can **make payments (Cash/Cheque)** to select the relevant invoice.

Cash Payments





Cheque Payments



7.4. Previous Transactions

- By using this tile, the rep can view the previous transactions to the shop.

7.5. Image Upload

- The image upload function can be used to upload images to the system. The rep cannot upload images that are in his gallery.
- He can only capture live images through the system.

7.6. Survey

- We can push some questionnaires to the system, and the rep can update the answers to the questions there to do a survey himself.
- Surveys are created in the backend. It is a separate module.

7.7. Competitor Stock

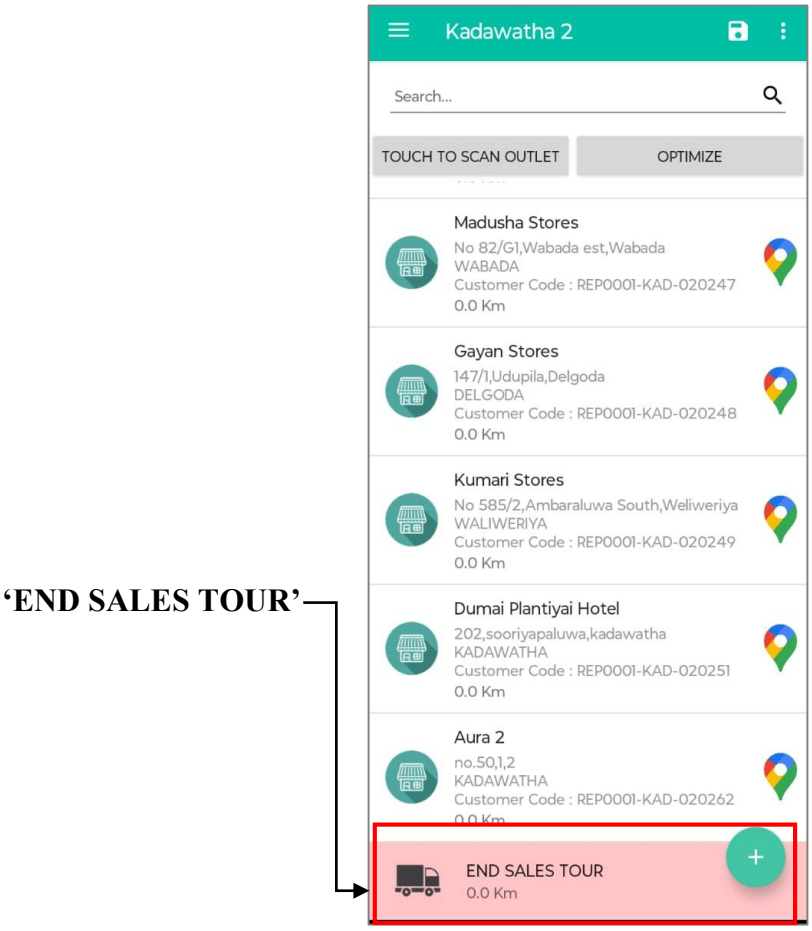
- Salesperson can enter the competitor's stock by using this tab. The user can enter the quantity of the relevant SKUs in the outlet.
- Competitor Items should be added from the back end.

7.8. Company Stock

- Salesperson can enter the company stocks at the outlet according to the company request.
- The user can enter the quantity of the relevant SKUs in the outlet.

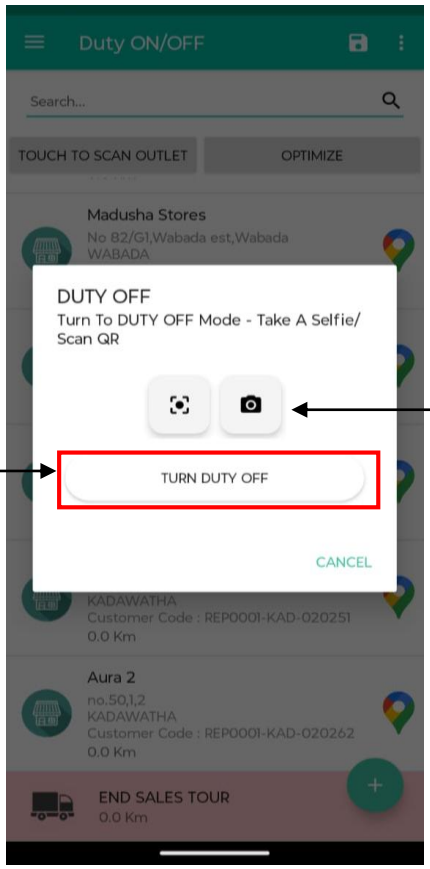
8. End Sales Tour

- After doing the transactions and back.
- Then click on the **'END SALES TOUR'.**



9. Duty Off

- Click on the **'Image' icon** and capture the image.
- Then click on the **'Turn DUTY OFF'** Button.

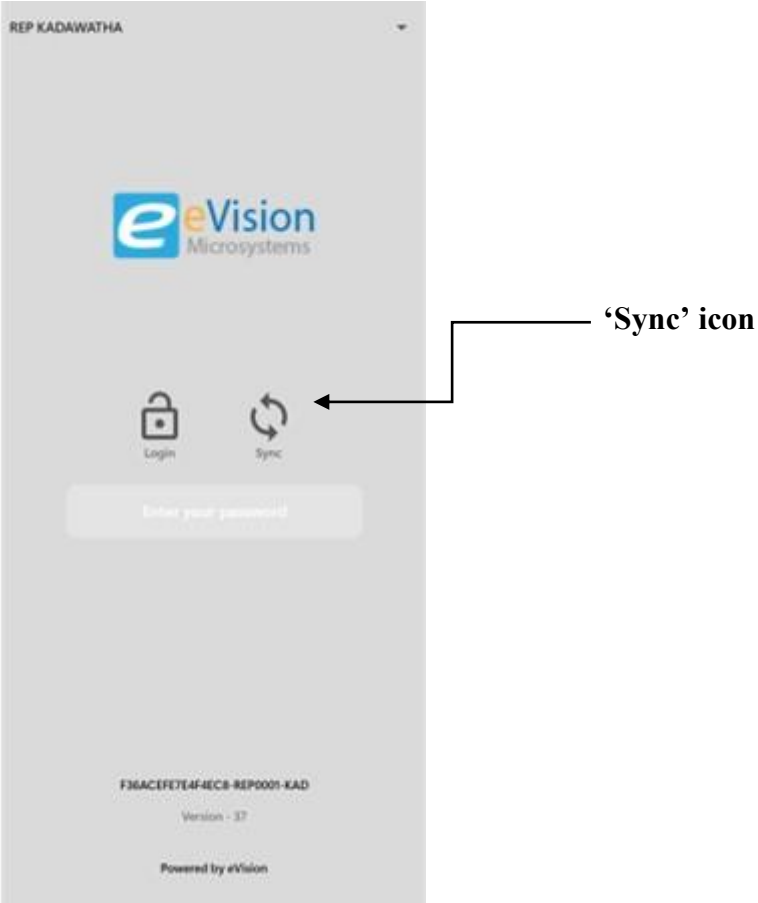


1.Image Icon

2.'Turn DUTY OFF' Button

10. Sync

- Finally click on the **'Sync'** icon.



End
